## **Exhibit 6 - Supplemental Engineering Statement**

in support of a  
CP Modification, BNPTTL-20000731AFG  
Channel 33, Chico, CA  
Paul Strieby / Matt Tuter

### **BACKGROUND**

Applicant is filing a displacement application for the above captioned construction permit. The displacement is based on the facts as listed in the original Exhibit 6 filing.

### **CO-CHANNEL APPLICATIONS**

Because the applicant is a displacement, this application has priority over the following two applications:

K511D,	Chico, CA	(BNPTTL20000831BSU)
K511S,	Red Bluff, CA	(BNPTTL20000831ARS)

### **DISPLACEMENT MOVE DISTANCE**

Strieby/Tuter filed an application in the August 2000 LPTV Filing window at a communications site in Cohasset, CA. However, another applicant in the August 2000 Filing window applied for channel 32 which caused an MX situation. Strieby/Tuter filed a minor change application to move to a site 1.5 km east of Magalia, CA. The Magalia site is approximately 21 km southeast of the Cohasset site. Thus Strieby/Tuter cleared the M-130 group MX situation.

When the construction permit for KCSO-LP, channel 34, to displace to channel 33 was granted in July 2001, KCSO-LP caused unacceptable interference to the applicants channel 33 construction permit issued in February 2004.

Strieby/Tuter are filing an application to move back to the original Cohasset site and displace to channel 51.
