Program Test Authority

Dear Applicant:

This letter is in reference to KBVB's request for reinstatement of program test authority ("PTA") filed September 15, 2008.

This request is filed pursuant to a special operating condition contained in KBVB's construction permit BMPH-20070914AAO. The condition states that a request for program test authority must be filed if the antenna to be used is not an ERI rototiller (EPA Type 3), eight sectioned antenna. In its request, KBVB is proposing to use an an ERI rototiller (EPA Type 3), twelve sectioned antenna in order to show compliance with the special operating condition.

Upon review of KBVB's request, we find that compliance with the radiofrequency electromagnetic field limit would be maintained if the proposed ERI rototiller (EPA Type 3), twelve sectioned antenna was to be used. Accordingly, Automatic Program Test Authority IS HEREBY REINSTATED. Automatic program test authority may commence pursuant to 47 C.F.R. § 73.1620.

Sincerely,

Rodolfo F. Bonacci
