

NEW FM TRANSLATOR, MODESTO, CA

EXHIBIT 11 – NARRATIVE

**ENGINEERING STATEMENT**

Powell Meredith Communications Company ("PMCC") is an applicant for a new commercial FM translator at Modesto, California (BNPFT-20030317ART, FIN 142714). The PMCC application was selected by the Commission as a singleton in Public Notice DA-03-2095, and PMCC was invited to file a long form application for this facility. This is the purpose of the instant application.

An interference study list and contour map appear in Exhibits 12, 12.1 and 12.2, showing compliance with 47 CFR §74.1204(a).

Compliance with the maximum permitted uncontrolled (general population) exposure limits contained in 47 CFR §1.1310 was determined utilizing the RF worksheets in Appendix A of the Instructions and checked in the OET computer program FMMODEL. PMCC affirms that it will suspend transmission as needed to protect tower workers from exposure to RF radiation in excess of the controlled (occupational) limits in the cited regulation.

The above and attached information is true and correct as to my knowledge and belief.
