

ENGINEERING STATEMENT

AMENDMENT TO FCC FILE NO. BXPED-20040513ABO

APPLICATION FOR AUXILIARY ANTENNA FOR KCRU, OXNARD, CA

This Engineering Statement was prepared on behalf of Santa Monica Community College District, licensee of NCE-FM Station KCRU, Oxnard, California, to amend its pending application for an auxiliary antenna. The purpose of this amendment is to reduce the ERP from 0.250 kW to 0.110 kW to eliminate the overlap of the auxiliary contour which occurred just prior to reaching the water's edge of the Pacific Ocean.

Figure 1 shows both the currently licensed KCRU 60 dBu field strength contour and the amended 110 Watt 60 dBu contour of the proposed auxiliary antenna.
