WPST is 2nd adjacent to the proposed facility. The WPST signal at the proposed site is 70.95 dBu, so the corresponding interfering signal is 110.95 dBu. The attached spreadsheet shows that with the proposed antenna, the interfering contour does not reach the ground. The attached aerial photos show that there are no tall buildings in the vicinity and the site is not a rooftop site. Hence there can be no population in the interfering contour, and a no-population waiver is requested.
