

CERTIFICATION

This is a certification that Metz Engineers performed a field survey on August 10, 1999 in Monroe County, Pa. The survey was performed for Four Rivers Community Broadcasting Corporation, Station WBYX Stroudsburg, PA. The survey consisted of a solar observation to determine true north.

Upon recovery of these previously established base line azimuth control points on August 4, 2004, we aligned a Shively, model #6513-2-DA, also known as WBYX-FM antenna. The orientation of the antenna is 300 degrees true north.

Therefore, Metz Engineers certifies that the WBYX-FM antenna aligned on August 4, 2004 is in proper alignment as specified.
