NARRATIVE

FCC DA 13 – 1871 authorized Applicant to file long form for a translator construction permit located at Hondo, Texas. This application will incorporate a few minor changes that are different from the original short form application. What is being changed is the antenna location, ERP and RCAGL of the proposal. These changes will not impact any LPFM opportunities in the upcoming October LPFM Window. While the location of the transmitter of this proposal is outside the 39 km buffer zone of the San Antonio, Texas Market, it is in the San Antonio Market. A TOP 50 Study, included herein, indicates that at the transmitter site of this proposal, there exist several other channels for future LPFM opportunities. Some of the channels are: 228, 233, 234, 243, 244, 245, 249, 251, 260, 264, 268, 279, 292, and 300. Therefore this application does not preclude the last LPFM opportunity at the translator transmitter site.
