Environment Impact & RFR Compliance Statement

WYLR is located at an established communications site that is in compliance with all environmental impact requirements.

This minor change specifies a correction to the geographical coordinates. There is no change to the ERP of 3.0 kW (H&V, non-da) or the antenna COR height above ground of 65 meters. For a worst case estimation at 2 meters above ground level at the base of the tower the RFR is no more than **25.3%** of the general population/uncontrolled MPE limit.

There are no other broadcast facilities at the site.

RFR hazard signs are posted at the site and the site has restricted access to only authorized personnel. The applicant certifies that in cooperation with other users of the site all authorized personnel will be protected from RFR exposure in excess of FCC guidelines while accessing any controlled exposure area, including the tower, by either reducing power or ceasing operations. Information pertaining to the contact representative of the facility will be posted.
