**October 2002**

**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of KSKD, Inc. ("KI"), licensee of radio station KNTO, Channel 227A, Chowchilla, California. KI herein proposes to modify the present license for station KNTO, to reflect a change in the antenna system and transmitter power output for KNTO. No other changes are proposed. This application has no impact on the outstanding construction permit authorizing minor changes in the facilities of KNTO (BPH-20000118AEJ).<sup>1</sup> Attached as Exhibit A is a calculation of the transmitter output power for KNTO, based on the change in antenna system.

Since this is a change which can be implemented without prior Commission approval, there was no construction permit issued. However, KI herein states that it will reduce power of KNTO or cease operation, as necessary, to ensure persons with access to the tower and site will not be exposed to radio frequency electromagnetic levels in excess of the Commission's limits.

---

1) The licensee still contemplates implementing the permit in the future.
