

## Family of God Fellowship Church, Inc.

### Use of Proposed LPFM Station in Furtherance of Our Educational Objectives

Family of God Fellowship Church intends on using our proposed Low Power FM radio station to educate the public concerning future or current events, local news and religious matters. We will broadcast our church services and special events live, as well as, have teaching and preaching on any number of subjects spanning the entire Bible.

It is our goal to establish local educational, biblical and religious programming. We intend to engage local Pastors and congregations to fill time slots and develop radio programming that will further educate the public about that particular church and religious material in general.

Further, we plan to engage members of the community, by educating volunteers and teaching them how to operate a radio station and develop an “on air” skill set. This will allow the volunteer radio board operators to learn the broadcast trade.

Further, we will allow local musicians the opportunity to broadcast their music and gain public exposure.

It is our vision to be a local voice in our religious community where there is currently no such local voice.
