Cornerstone Television, Inc.

W45BT, Brookville, PA: Digital Minor Modification Application

**EXHIBIT 11**

**LPTV FLASH-CUT AS DIGITAL – INTERFERENCE STUDIES**

1. Cornerstone Television, Inc. ("Applicant") is the licensee of W45BT, Brookville, PA, analog channel 45. By this application, Applicant is proposing to flash-cut as digital on channel 45 at its licensed transmitter site. This is a minor change application.

2. Attached as Figure 1 (for the post-transition TV environment) and Figure 2 (for the pre-transition TV environment) are the OET-69 study results for the proposed facility (as the referenced station) as determined on a Sun Computer using a Solaris (Unix-based) operating system and using the same OET-69 software as developed for use by the FCC. (According to the software developer, the program used herein provides identical results as the FCC's OET-69 processing program.) All studies are conducted in accordance with current FCC Rules and Regulations. As demonstrated by Figures 1 and 2, the proposed facility adequately protects all required US broadcast stations as required by the FCC Rules.

3. The applicant accepts any interference that is predicted to exist to the proposed facility by any licensed, authorized or previously-proposed primary TV station. The applicant also accepts any interference that is predicted to exist to the proposed facility by any secondary TV facility that is given preferential status by the FCC over the Applicant's herein proposed facility.
