

EXHIBIT 12

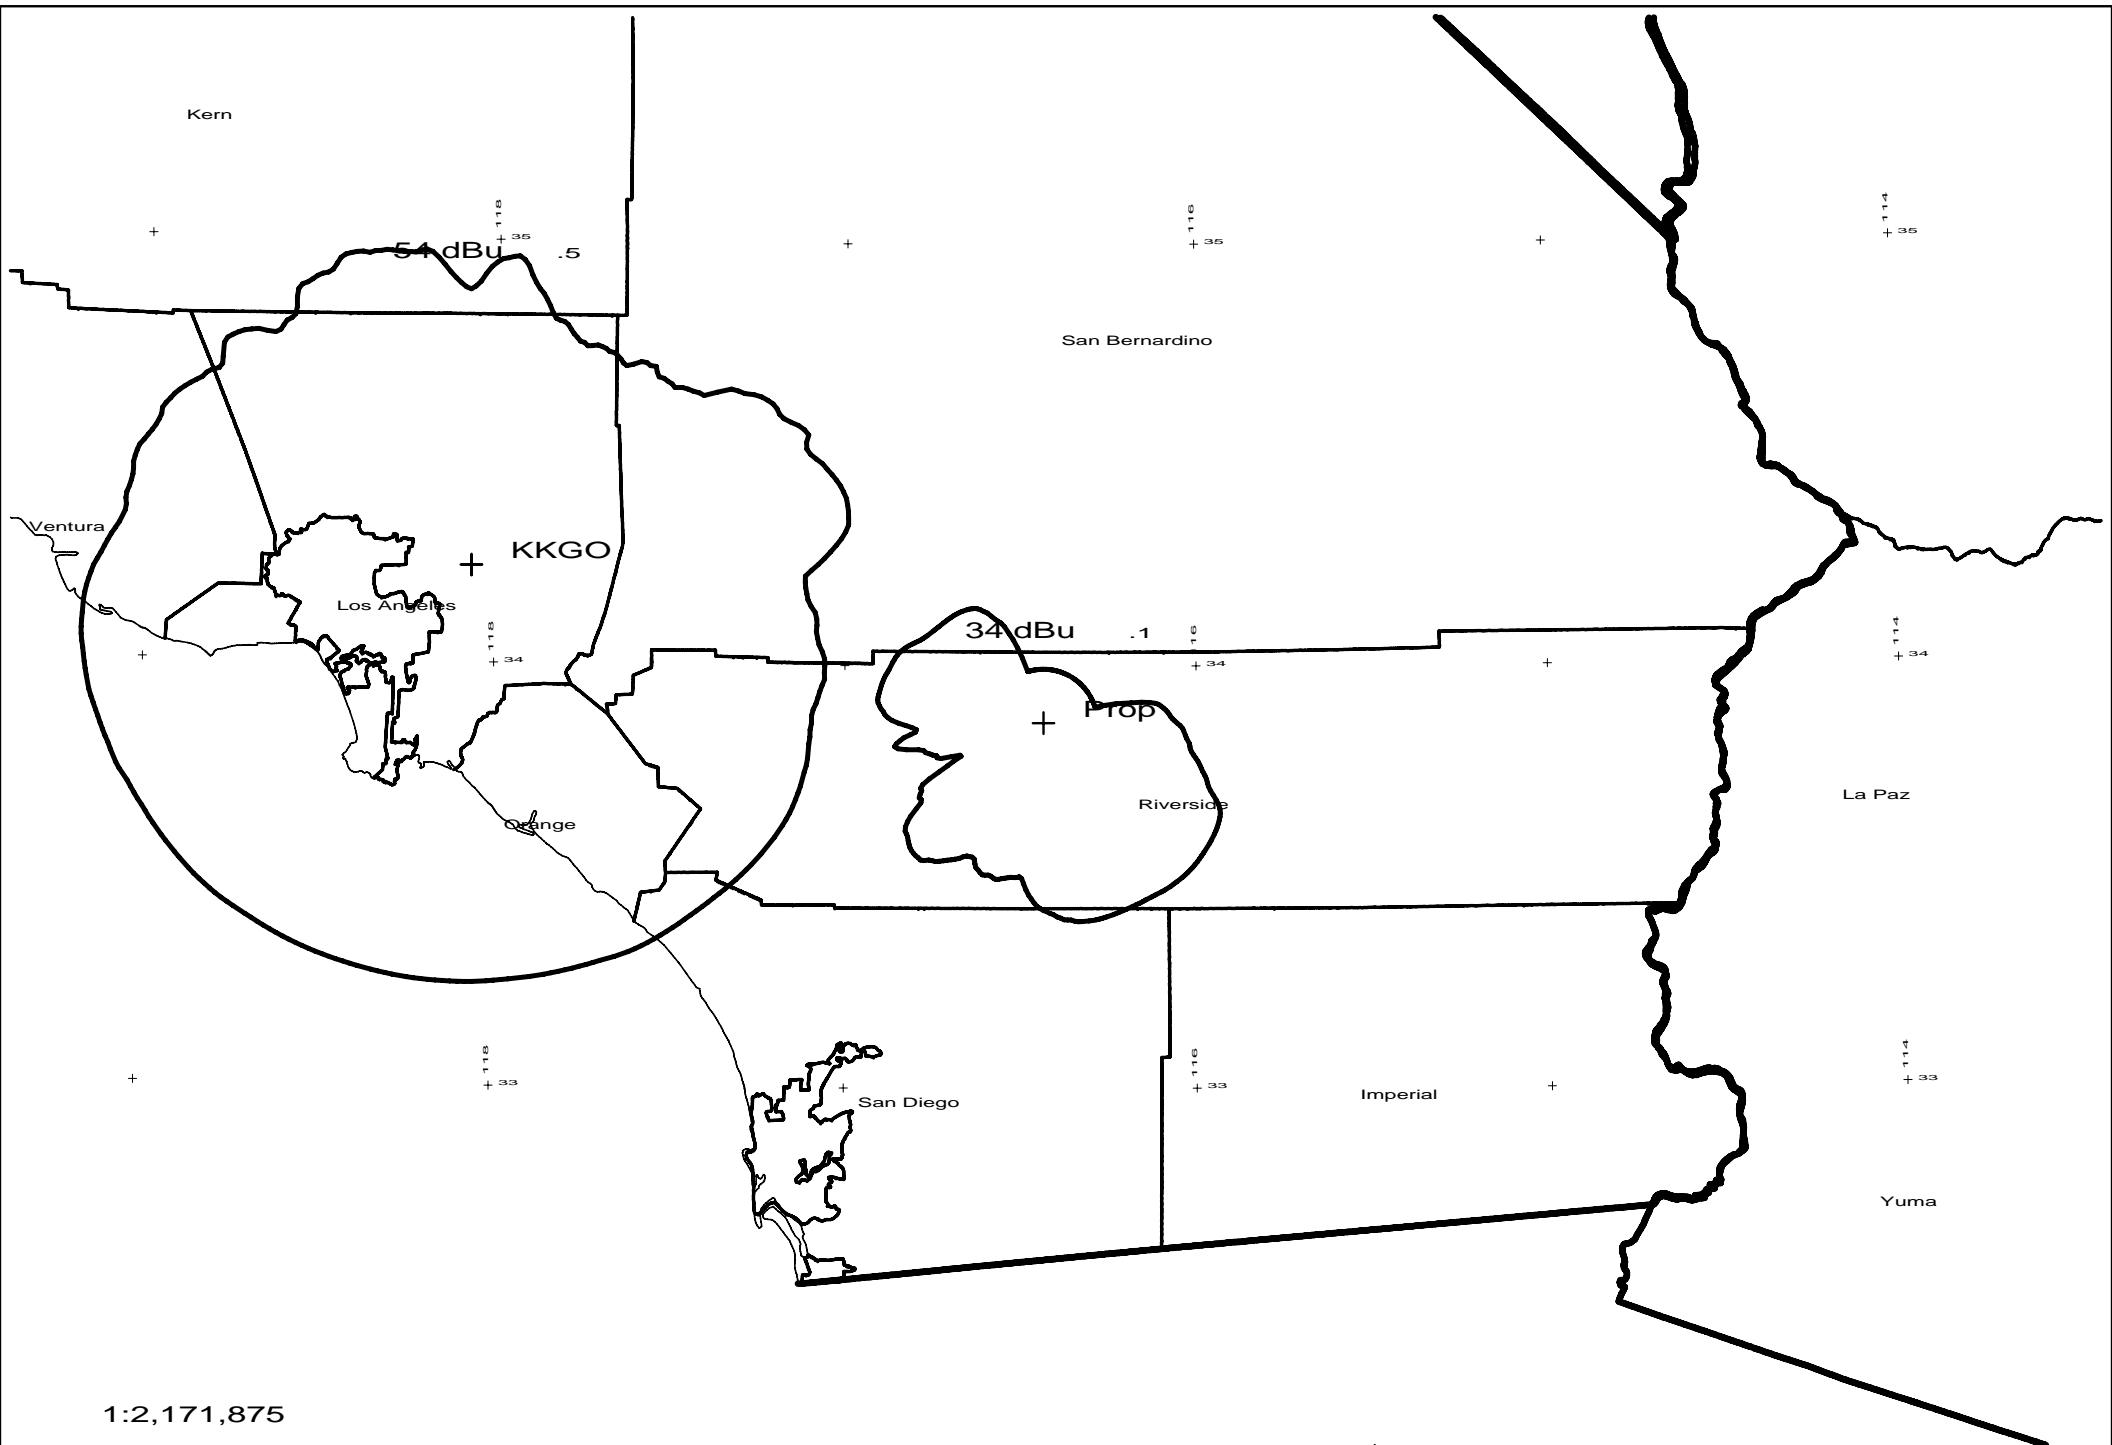

Waiver Request of Section 74.1204
Thousand Palms, CA 10 Watts ERP
Minor Modification – Channel Change to 286
Calvary Chapel of Twin Falls, Inc.

The proposed site is contained entirely inside the service contour of second-adjacent FM Station KDES-FM Palm Springs, CA

Please note that underlying permit BPFT-20040601BHS, issued Sept 1, 2004, has expired and this application is to take the place of that construction permit. KXRS Hemet, CA has obtained a Construction Permit to make their channel change, but has not yet applied for a License for BPH-20040205AAK, granted May 3, 2006. CCTF wishes to coordinate our frequency change when KXRS applies for Program Test Authority. A City of License change has been made with this application as well, from Desert Hot Spring to Thousand Palms, CA.

KDES-FM

The proposed site is contained entirely inside the service contour of second-adjacent FM Station KDES-FM, Channel 284B, 41kW, Palm Springs, CA. The level of least arriving protected F(50,50) signal at the proposed transmitter site is in excess of 200-dBu. Using the Undesired-to-Desired method for calculating proposed interference, the interfering contour with respect to KDES-FM is in excess of 240-dBu (free-space contour method employed). The interfering signal would, in the worst case at the maximum radial, extend less than 1 meter from the center of radiation, which already exists at 10 meters AGL. This proposal is only to change channel/frequency and no other changes will be made with the equipment on the tower. This tower is located in a sparsely populated area on Edom Hill. Because there are no residences, businesses or major roads that are located within this interference contour, which does not touch the ground, Calvary Chapel of Twin Falls, Inc. respectfully requests a waiver of the FM translator contour overlap regulations with respect to second-adjacent FM Station KDES-FM.
