

August 28, 2007

Mr. Earl Thompson, President  
Okaloosa Public Radio  
954 Hwy. C4-A  
Baker, FL 32531

Dear Mr. Thompson:

We understand that Okaloosa Public Radio is planning to file an application with the Federal Communications Commission for a minor change to the license of radio station Permit # BPED-19970326MB. Okaloosa Public Radio proposes a change in ERP to 35,000 watts, with no change in antenna HAAT. The station would operate with a vertically polarized antenna.

Okaloosa Public Radio has agreed to correct any interference to the viewers of WCTV by reducing the ERP to 20 KW immediately upon written notice from WCTV reporting any interference and not return to full power until such time as WCTV ends its analog broadcasting, currently scheduled for February 17, 2009.

With respect to interference protection for WCTV Channel 6, we concur with the proposed change.

Sincerely,

A handwritten signature in black ink, appearing to read "Jim Killinger". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Jim Killinger  
Chief Engineer WCTV
