

Environment Impact & RFR Compliance Statement

FM translator K205BM will be located at an established communications site that is in compliance with all environmental impact requirements.

This minor change application proposes an ERP of 0.250 kW (V, DA) at a COR AGL of 40 meters. For a worst case estimation at 2 meters above ground level at the base of the tower the RFR is no more than **2.9%** of the general population/uncontrolled MPE limit.

There are no other broadcast facilities at the site. Furthermore, facilities that contribute at the site no more than 5% of the general population/uncontrolled MPE limit comply with the requirements of OET Bulletin No. 65 with no further study. Therefore this minor change application is in compliance with all environmental and RFR requirements.

RFR hazard signs will be posted at the site and the site has restricted access to only authorized personnel. The applicant certifies that in cooperation with other users of the site all authorized personnel will be protected from RFR exposure in excess of FCC guidelines while accessing any controlled exposure area, including the tower, by either reducing power or ceasing operations. Information pertaining to the contact representative of the facility will be posted.
