

ENGINEERING STATEMENT

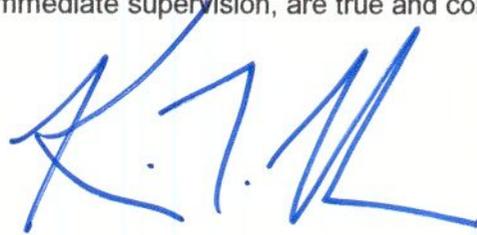

The engineering data contained herein have been prepared on behalf of COMMUNITY EDUCATIONAL TELEVISION, INC., licensee of noncommercial television station KLUJ-TV in Harlingen, Texas, in support of this request for Special Temporary Authority to operate KLUJ-DT on Channel 34 with reduced facilities, while the application for maximized facilities (BPEDT-19991021ABU) remains pending due to Mexican coordination. No change in site location or effective antenna height is proposed herein.

Exhibit B provides antenna pattern data. Exhibit C is a map upon which the predicted service contours are plotted. As shown, the city of license is completely contained within the proposed 48 dBu service contour. It is important to note that the proposed 41 dBu contour lies wholly within that allotted to KLUJ-DT by the FCC. As a result, no interference study is provided herein. A power density calculation is provided in Exhibit D.

It is not expected that the proposed facility would cause objectionable interference to any other broadcast or non-broadcast station authorized to operate at or near the KLUJ-DT site. However, if such should occur, the owner of KLUJ-DT recognizes its obligation to take whatever corrective actions are necessary.

Since no change in the overall height or location of the existing tower is proposed herein, the FAA has not been notified of this application. In addition, the FCC issued Antenna Structure Registration Number 1047398 to this tower.

I declare under penalty of perjury that the foregoing statements and the attached exhibits, which were prepared by me or under my immediate supervision, are true and correct to the best of my knowledge and belief.

A handwritten signature in blue ink, appearing to read 'K.T. Fisher', with a stylized flourish at the end.

KEVIN T. FISHER
