Subject: RE: KNLT, Palmer, ALaska Minor Change Application (BPH-20140812ACE)

Hello Lee,

KNLT permit application – the applicant checked “N” to the environmental certification. We can’t grant the application until it’s amended to certify “Y” to the environmental certification.

KNLT license application – program test authority granted via email on 8/1/2014. Dale Bickel is the engineer working on it and he hopes to complete his license review in a couple of weeks.

If you have any questions, please let me know.

Rudy

Subject: KNLT, Palmer, ALaska Minor Change Application (BPH-20140812ACE)

Rudy: It seems like I am writing you every other day lately. It is weird how I can go six months without having anything before you and then three or four things come up in two weeks. I do not want to appear pushy so please excuse me if I am overdoing it by writing you again. I am asking about a minor change application filed by Station KNLT(FM), Palmer, Alaska (BPH-20140812ACE). The client has advised me that he would like to implement the proposed change as soon as possible because it is Alaska and the weather will soon change for the considerably worse. The initial license to cover application was filed in late July (BLH-20140730ACB) and is pending. I do not know whether there is a problem with the license application or if it just takes awhile for license applications which already have been granted program test authority to be reviewed because they are not considered to be a high priority, since the station is already operating. A few applications filed around the same time as KNLT have recently been granted. Therefore, I am asking when you think this minor change application will undergo engineering review. Lee Peltzman
