## ENGINEERING STATEMENT

In support of an

**Application for Construction Permit**

**For Digital Channel 13**

**KCOS-DT El Paso, TX**

**4.5 kW ERP 259 m HAAT**

### PURPOSE

MARSAND, INC. has been retained by El Paso Public Television Foundation, the Licensee of KCOS analog Channel 13 of El Paso, TX, to prepare this engineering statement in support of an Application for Construction Permit (CP) for post-transition digital service on KCOS-DT Channel 13. There is a License for the paired transitional digital Channel 30 (BLEDT-20060728AC), but a form 382 was filed electing to return to the existing, licensed analog Channel 13 (BLET-19800321KF). Subsequently, the Federal Communications Commission (the “Commission”) established Channel 13 for KCOS’s post-transition operation in its release of the Seventh Report and Order in MB Docket No. 87-258 Appendix B (“Appendix B”). In this application, KCOS-DT seeks authorization for post-transitional digital operation on its Channel 13 at 4.5 kW Effective Radiated Power (ERP) and 259 m Height Above Average Terrain (HAAT) utilizing the existing, analog non-directional antenna.

### DISCUSSION

KCOS-DT proposes to use the existing, licensed analog Channel 13 antenna, upgrade its analog transmitter for digital service, and install a new digital RF filter. Since the predicted 36 dBu F(50,90) contour of the proposed digital facilities would fall outside of the predicted DTV F(50,90) service grade contour (see Figure 1) of the allotted digital facility specified in Appendix B, KCOS-DT requests a waiver of the DTV Filing Freeze as permitted in Paragraph 151 of the Third Periodic Review Report and Order. The predicted contour of the proposed

# MARSAND, INC.

Matthew A. Sanderford, Jr., P.E.

digital facility does not extend more than 5 miles in any azimuth more than the predicted contour of the allotted facility in Appendix B (See "Contour Comparison – Proposed vs. Appendix B" in the appendix of this document). Furthermore, an interference study using the TV Process by Techware (a software program which is familiar to the Commission that is written in Fortran and run on a Sun Microsystems workstation and employs the methods outlined in the OET 69 Bulletin), confirms that the proposed facility would not exceed 0.5% new interference to any other station listed in Appendix B. A summary of the interference study is listed in **Table 2**.

The predicted F(50,90) 43 dBu contour would encompass the principal community, El Paso, TX, entirely as shown in **Figure 1**. A population study under the 36 dBu contour predicts service to 816,317 people or 96% of the population specified in the new DTV Table Appendix B.

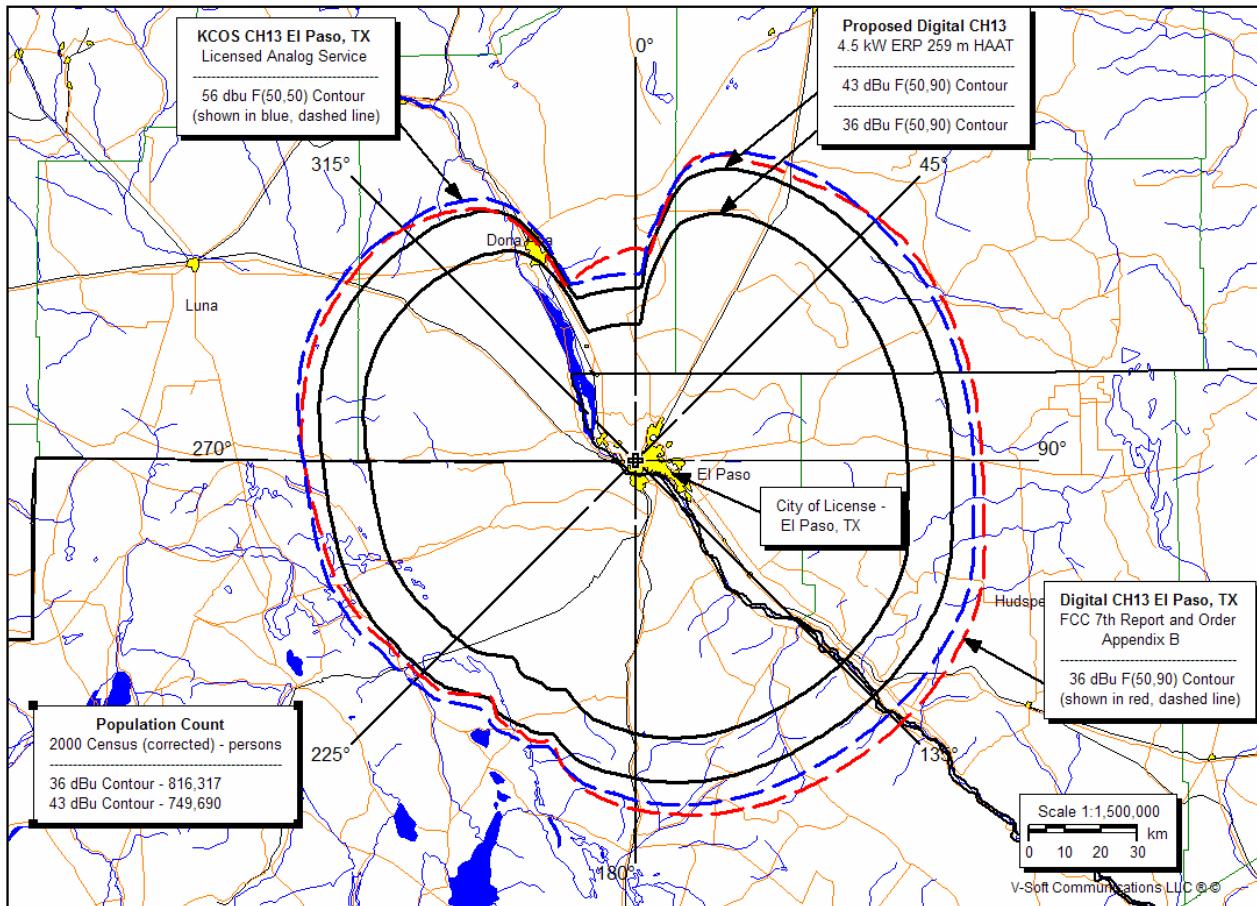

There is no additional predicted interference to others based on the DTV Table Appendix B. The proposal is clear of any FCC monitoring stations, quiet zones, and Table Mountain. It is also further than 3.2 km from the nearest AM station. However, the proposal is 3.4 km from the Mexican Border, and, if required, international coordination is requested.

## CONCLUSION

It is respectfully requested that the Commission grant this request for CP for the proposed transmission facility as indicated in the accompanying TECH BOX.

# MARSAND, INC.

Stations Potentially Affected by Proposal	Interference	
	Existing	New
KOBG-TV Silver City, NM	(See Note 2)	
KRQE Albuquerque, NM	0.00%	0.0032%

## Notes:

1. Proposed Station is beyond the site to the nearest cell
2. Proposal causes no interference.

## DECLARATION

Matthew A. Sanderford, Jr., P.E., declares and states that he is a graduate Electrical Engineer with a Bachelor of Science Degree in Electrical Engineering from the University of Texas at El Paso, a Licensed Professional Engineer in the State of Texas, and his qualifications are known to the Federal Communications Commission, and that he is President of MARSAND, INC., a Registered Professional Engineering firm in the State of Texas, and that firm has been retained by El Paso Public Broadcasting Foundation, to perform the engineering support as contained in this report.

All facts contained herein are true of his own knowledge except where stated to be on information or belief provided by El Paso Public Broadcasting Foundation, and as to those facts, he believes them to be true.

---

I declare under penalty of perjury that the foregoing is true and correct.

## SYSTEM SUMMARY

### Antenna:

Type:	<b>TF-12HT</b>	ERP:	<b>24.4 kW</b>	<b>( 13.87 dBk )</b>
Channel:	<b>13</b>	RMS Gain*:	<b>11.8</b>	<b>( 10.72 dB )</b>
Location:	<b>El Paso, TX</b>	Input Power:	<b>2.1 kW</b>	<b>( 3.15 dBk )</b>

H Pol

### Transmission Line:

Type:	<b>EIA/DCA</b>	Attenuation:	<b>0.39 dB</b>
Size:	<b>3-1/8 in</b>	Efficiency:	<b>91.4%</b>
Impedance:	<b>50 ohm</b>		
Length:	<b>270 ft</b>		<b>82.3 m</b>

### Transmitter:

Power Required: **2.30 kW** **( 3.54 dBk )**

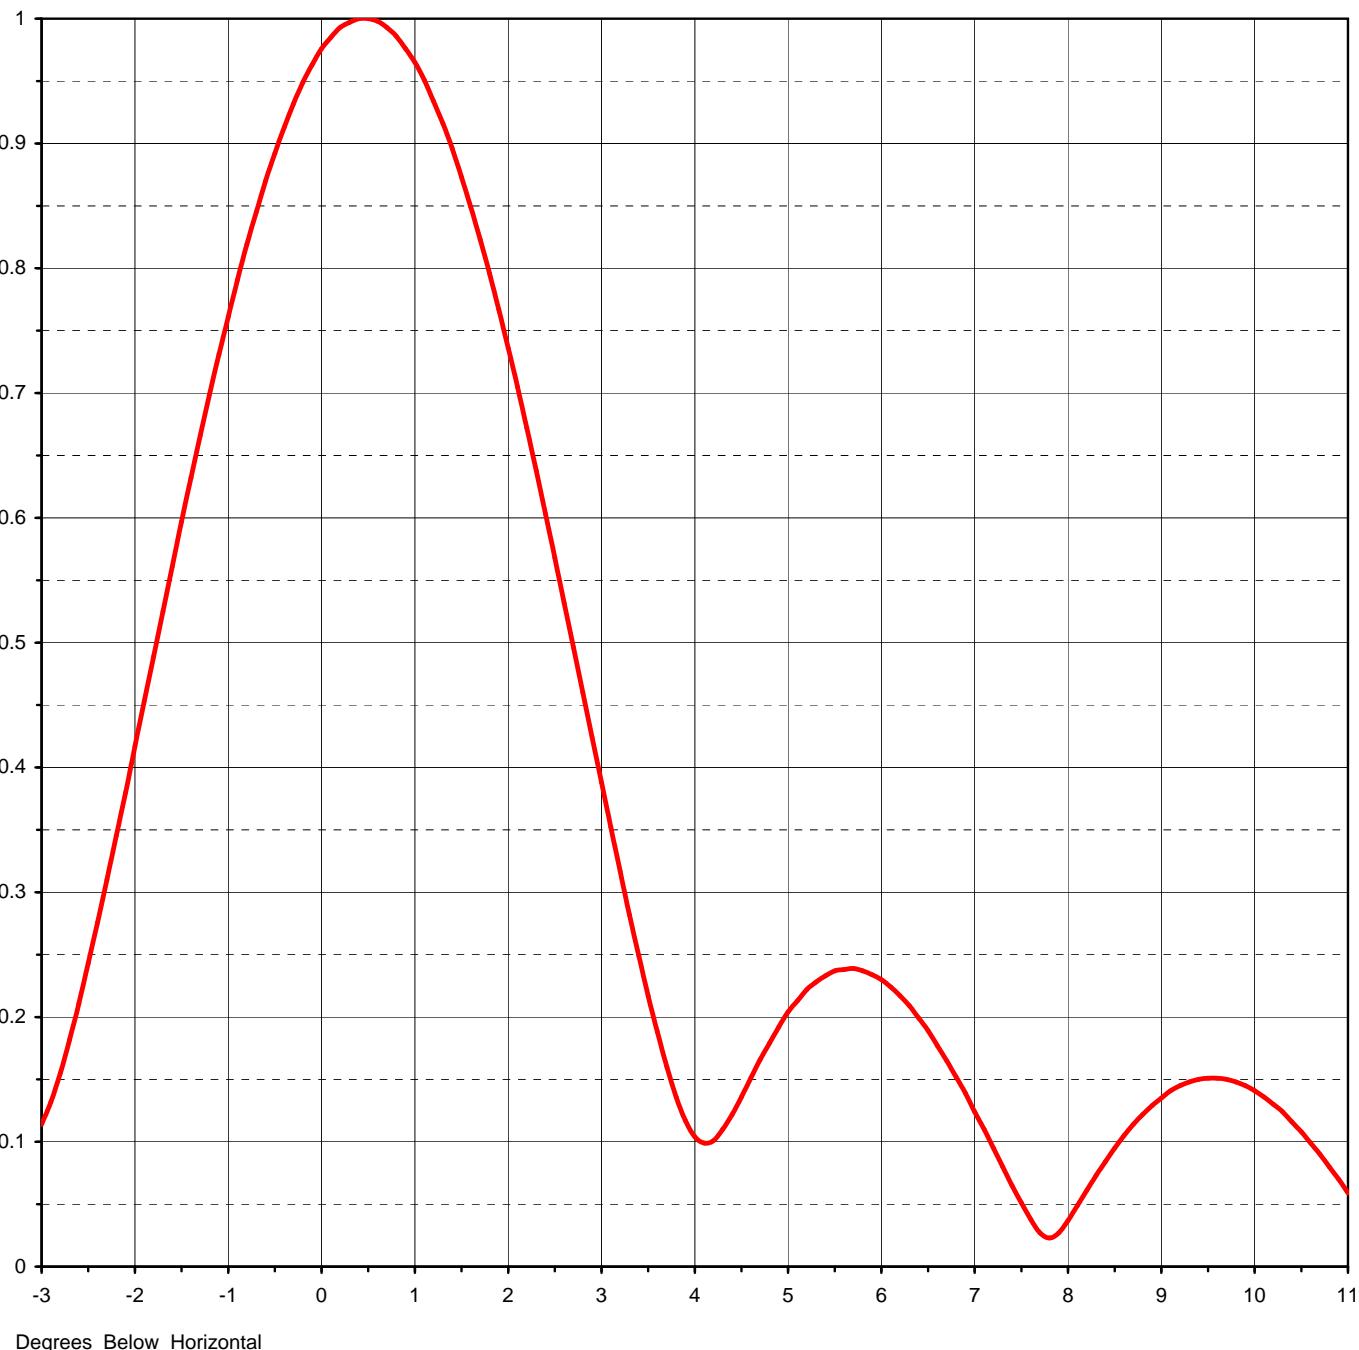

\* Gain is with respect to half wave dipole.

Average HAAT for radials shown: 226.8 m

kcos-dt 36db contour - proposed.txt

Call Letters: KCOS-DT (Proposed)

File Number: BLET19800321KF

Latitude: 31-47-15 N

Longitude: 106-28-47 W

ERP: 4.50 kW

Channel: 13

Frequency: 213.0 MHz

AMSL Height: 1500.1 m

Elevation: 1421.3 m

HAAT: 258.53 m

Horiz. Antenna Pattern: Omni

Vert. Elevation Pattern: Yes

Electrical Beam Tilt: 0.5

Type of contour: FCC

Location Variability: 50.0 %

Time Variability: 90.0 %

# of Radials Calculated: 360

Field Strength: 36.00 dBuV/m

Primary Terrain: V-Soft 3 Second US Terrain

Average HAAT for radials shown: 259.9 m

kcos-dt 43db contour - proposed.txt

Call Letters: KCOS-DT (Proposed)

File Number: BLET19800321KF

Latitude: 31-47-15 N

Longitude: 106-28-47 W

ERP: 4.50 kW

Channel: 13

Frequency: 213.0 MHz

AMSL Height: 1500.1 m

Elevation: 1421.3 m

HAAT: 258.53 m

Horiz. Antenna Pattern: Omni

Vert. Elevation Pattern: Yes

Electrical Beam Tilt: 0.5

Type of contour: FCC

Location Variability: 50.0 %

Time Variability: 90.0 %

# of Radials Calculated: 360

Field Strength: 43.00 dBuV/m

Primary Terrain: V-Soft 3 Second US Terrain
