Re: *Bellevue, Iowa Cell Tower Antennae* – Project No. 2006042

Dear Mr. Locke:

Per your instructions, on February 1<sup>st</sup>, 2006, we visited the Cell Tower located approximately ½ mile East of St. Catherine's Catholic Church in Section 26, Township 88 North (T88N), Range 3 East (R3E) of the Fifth Principal Meridian (5th PM), Dubuque County, Iowa at 4011 St. Catherine Road, Bellevue, Iowa, and staked a line having a geodetic azimuth of 317 degrees from the center of said tower.

We received conformation that the antennae had been placed on the tower and re-visited the site on April, 23<sup>rd</sup>, 2006. Per close, visual inspection of the tower and antennae, I can now certify that the antennae has be placed and aimed at that 317 degree azimuth.

Thank you for your kind and prompt consideration. If you have questions or comments please contact me at this office. We have attached an invoice for our services.

Sincerely,  
*Norwest Surveying Services, Inc.*

William E. Holt, PLS  
President
