Certification of Azimuth

I Patrick W. Click, a registered Professional Land Surveyor in the State of Colorado, do hereby state the following:

On October 8, 2014, I performed a survey to determine the azimuth orientation of the KSTR Auxiliary FM directional antenna, located on Black Ridge in unincorporated Mesa County, Colorado. The survey was performed under my direct supervision, and the azimuth of the antenna axis is oriented to 120°, relative to True North as determined by the North American Datum of 1983. Observational data was determined using Trimble 5800 GPS Systems.
