In re: Pan American Broadcasting Co., Inc. (PABCI)
KDAZ, Albuquerque, New Mexico
Facility ID No.: 51424
File Number: BL-20210528AAN

Dear Mr. Gonzales:

This letter is in reference to the request for program test authority filed by PABCI on May 28, 2021, included with the FCC Form 302 license application BL-20210528AAN to cover Construction Permit BMP-20200629AAK.

A review of the application reveals that additional spurious emission measurements are needed on 560 kHz and 1540 kHz frequencies. In addition, we find that the non-directional (ND) proof of performance required in condition #7 is not acceptable as it is incorrectly analyzed. However, since the ND measurements would have already provided under KDAZ's previous directional license proof of performance, we consider that condition #7 is moot. Accordingly, further action on the application will be withheld for thirty (30) days from the date of this letter in order to provide an opportunity to submit additional spurious measurements. Failure to file an amendment or respond within this time period will result in the dismissal of the application pursuant to Section 73.2568 of the Rules.

Authority is granted to PABCI to commence limited program tests for station KDAZ(AM) in accordance with Section 73.1620 of the Commission's Rules and Construction Permit BMP-20200629AAK, to operate on 700 kHz with a daytime power of 0.45 kW, a nighttime power of 0.055 kW, a daytime current of 3.31 kW, and a nighttime current of 1.16 amperes, and a measured resistance of 41 ohms. This authority expires on **Oct 7, 2021**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Son Nguyen", is located below the "Sincerely," text.
