

# KHAS-DT Modification Exhibit "53"

FCC 301 section 3D (DTV Engineering) item #2 under the certification category requires determination with regards to compliance with FCC-specified guidelines for human exposure to radiofrequency radiation. These requirements are outlined quite clearly under OET Bulletin No. 65 (edition 97-01 August 1997).

At this time, environmental assessment is not required based on the use of the FCC's worksheets and a review of the station's proposed facility and station policies as suggested in the current edition of NAB's *A Broadcasters Guide to FCC RF Radiation Regulation Compliance*, which includes the full text of the Commission's *OET Bulletin No. 65* and the broadcasting-related *Supplement A*.
