

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
CCB TEXAS LICENSES, LLP

This statement and the attached figures were prepared on behalf of CCB Texas Licenses, LLP ("CCBTL"), a licensee subsidiary of Clear Channel Communications, Inc. ("CCC"). CCBTL proposes to modify the facilities of KNFX-FM, Bryan, Texas. A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership, time brokerage or joint sales:¹

Table 1: Proposed Commonly Owned, Brokered or Jointly-Sold Stations
Studied and Associated Arbitron Metro² Information

Calls	Fac ID	Band	Community	County	State	Geographic Arbitron Market	Declared Arbitron Market
KAGG	49944	FM	Madisonville	Madison	TX	Non-Metro	Bryan-College Station, TX
KKYS	54903	FM	Bryan	Brazos	TX	Bryan-College Station, TX	Bryan-College Station, TX
KNFX-FM	41410	FM	Bryan	Brazos	TX	Bryan-College Station, TX	Bryan-College Station, TX
KVJM	52835	FM	Hearne	Robertson	TX	Non-Metro	Bryan-College Station, TX

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), or are located in, or home to, the same Arbitron Metro market, an ownership study has been prepared in accordance with the Federal Communications Commission's local radio ownership rule.³

CCC does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the principal community contour of KNFX-FM as proposed, or which is located in the same Arbitron Metro⁴ as KNFX-FM. The community of license of KNFX-FM is located within the Bryan-College Station, Texas Arbitron Metro, and KNFX-FM is reported by BIA as being "Home" to that Metro. Contour overlap of the station to be modified, as depicted in Figure 1, also occurs with commonly-

¹ None of the following stations are attributable by virtue of a time brokerage agreement or joint sales agreement.

² Arbitron data presented herein is obtained from BIA's "Media Access Pro."

³ See 47 C.F.R. § 73.3555(a).

⁴ A station is considered to be "located in an Arbitron Metro" if the station's community of license is located within the boundaries of that Metro, or, the station is listed as "Home" to that Metro by BIA.

owned stations whose communities of license are located in the Bryan- College Station, Texas Arbitron Metro market, and commonly-owned stations whose communities of license are located outside any Arbitron Metro market.

Arbitron Market Study

KNFX-FM(FM) is reported by BIA as being "Home" to the Bryan-College Station, Texas Arbitron Metro. This proposal is in compliance with the local radio ownership rules for that Arbitron Metro, as evidenced by Table 2 below:

Table 2 - Stations Considered to be in the
Bryan-College Station, Texas Arbitron Metro⁵

Interim Contour-Overlap Analysis

Because the proposed principal community contour of the station to be modified intersects the principal community contour of a station under common

⁵ Source: BIA.

ownership or attribution whose community of license is located outside any Arbitron Metro, an interim contour-overlap analysis is also set forth in this statement.

Interim Contour-Based Radio Markets

A "radio market" under the interim contour-overlap method is the area encompassed by the mutually overlapping principal community contours of the stations under common-ownership or attribution. Here, such mutually overlapping contours form one "radio market" for interim contour-overlap analysis under the Commission's rules.

The "radio market" is defined by the mutually overlapping principal community contours of KNFX-FM, KNFX-FM-App, KAGG(FM), KKYS(FM), and KVJM(FM). The predicted principal community contours of these stations (4 FM), as well as other stations whose principal community contours overlap this combination, are shown in *Figure 1*. *Figure 2* is the tabulation of some of the radio stations identified in the contour-overlap "radio market."

Count of Stations in Defined Markets

The number of radio stations in a contour-overlap "radio market" is determined by counting the operating stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject commonly owned or attributable stations, excluding any stations whose transmitter sites are further than 92 kilometers from the perimeter of mutual overlap, and excluding any commonly owned or attributable stations that do not serve to define the market.

In the interim contour-overlap "radio market" studied herein, there are at least 20 radio stations, including the subject co-owned stations, which overlap or intersect with the defined "radio market." *Figure 2* is the tabulation of some of the radio stations identified in the contour-overlap "radio market".

Only known licensed, operating radio stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 45 degrees of azimuth.

Conclusions

In the Arbitron Metro market studied herein, there are at least 18 radio stations, including the subject commonly-owned 4-FM stations, which are home to the Bryan-College Station, Texas Metro. This proposal does not affect the existing number of commonly-owned stations in the subject Arbitron Metro.

In the interim contour-overlap "radio market" studied herein, there are at least 20 stations, including the commonly-owned 4-FM stations.

Based on the above, it is concluded that the proposed modification complies with Section 73.3555(a) of the FCC Rules.

Respectfully submitted,

Lance Nelms
FCC Engineer
