Program Test Authority

Dear Applicant:

This is in reference to the above captioned request for Program Test Authority dated June 9, 2005 requesting reinstatement of the automatic program test provisions of 47 C.F.R. § 73.1620.

Construction permit BMPED-20041221ABJ contained a special operating condition indicating that the automatic program test provisions of 47 C.F.R. § 73.1620 did not apply. The condition required the permittee to make radiofrequency ("RF") electromagnetic field strength measurements throughout the transmitter site area to determine if there are any areas that exceed the FCC guidelines for human exposure to RF fields. KQMC's technical consultant, Linda Adams, submitted an exhibit demonstrating compliance with the RF guidelines.

Accordingly, we find that the special operating condition contained in construction permit BMPED-20041221ABJ has been satisfied and automatic program test authority IS HEREBY REINSTATED. Automatic program test authority may commence pursuant to 47 C.F.R. § 73.1620.

Sincerely,

Rodolfo F. Bonacci  
Assistant Chief
