

ENGINEERING STATEMENT
IN SUPPORT OF AN AMENDMENT TO APPLICATION
(BPCDT-20080222AEF) FOR CONSTRUCTION PERMIT
FOR THE PROPOSED DIGITAL TV OPERATION OF
WDHS-DT, IRON MOUNTAIN, MICHIGAN
CHANNEL 8 – 22 kW - 171 METERS
JUNE 2008

This engineering statement has been prepared on behalf of W. Russell Withers, JR., licensee of TV station, Iron Mountain, Michigan, in support of an amendment of its application (BPCDT-20080222AEF) for construction permit for post-transition digital TV (DTV) operation on Channel 8.

At present , station WDHS, Facility ID Number 15498, is licensed to operate its analog TV facilities on Channel 8 (180-186 MHz) with 316 kW effective radiated power (ERP) and 171 meters antenna height above average terrain (HAAT) using a non-directional TV antenna. WDHS also holds a construction permit (CP) to operate its digital TV facility on Channel 22 (518-524 MHz) with 37 kW ERP, 171 meters HAAT and a directional TV antenna. The Commission has allotted channel 8 for digital TV operation of WDHS. WDHS is filing this instant application to amend its CP application and request operation on channel 8 with 22 kW ERP and 171 meters HAAT from the existing antenna site. The existing antenna and transmitter site will be utilized with no change in the overall tower height.

The following information provides pertinent data for the proposed WDHS-DT operation.

Name of the Licensee:	W. Russell Withers, JR.
Station Location:	MI-Iron Mountain
Channel:	8
Hours of Operation:	Unlimited
Transmitter:	Type Accepted
Antenna Type:	RCA, TE-6AH

Beam Tilt: None

Antenna Coordinates: North Latitude: 45 deg 49 min 10 sec
West Longitude: 88 deg 02 min 35 sec

Transmitter output power: As required to achieve authorized ERP

Maximum effective radiated power (Average): 22 kW
13.42 dBk

Elevation of site above mean sea level: 465 meters

Overall height of the tower above ground: 60 meters

Height of radiation center above ground (meters): 49 meters

Height of radiation center above mean sea level (meters): 514 meters

Height of radiation center above average terrain (meters): 171 meters

Antenna Structure Registration Number: Tower Pending Registration FAA
Review Completed

Response to questions listed on the FCC Form 301, Section III-D-DTV

Engineering

Question 1. (a)

WDHS will operate its DTV operation on Channel 8 as established in 47 C.F.R.

Section 73.622.

Question 1. (d)

WDHS is proposing to modify its application for CP to operate on its analog channel 8 from the existing antenna site. The proposed noise limited contour would extend, in all directions, beyond the facilities established in Appendix B of the Seventh Report and Order (MB Docket No. 87-268). However, an interference study conducted (see attached Table I) according to the FCC OET Bulletin 69 using 1 kilometer cell size

indicates the proposed WDHS-DT operation would not cause any interference to other DTV stations exceeding the Commission’s guidelines.

Question 1. (e)

The proposed DTV operation would serve 181,000 people within the noise limited service area as compared to 112,000 predicted population defined in the new DTV Table in Appendix B. As such, WDHS-DT proposed noise limited contour would serve 69,000 more people than listed in the new DTV Table in Appendix B.

Question 2.

The attached environmental statement demonstrates that there will not be any significant environmental impact from the proposed DTV operation in accordance with 47 C.F.R. Section 73.1307.

Question 3.

The attached map shows the proposed WDHS-DT contour will encompass the allotted principal community of Iron Mountain, Michigan (see Figure 1).

Question 4.

The proposed WDHS-DT facility complies with Section 73.1030 of the Commission’s rules; therefore, notification to radio astronomy installations, radio receiving installations and FCC monitoring stations is not required.

Question 5.

The existing WDHS-DT tower is over 20 years old and less than 200 feet above ground level and did not require registration. However, FCC review of the recent WDHS application (BPCDT-20080222AEF) revealed that the tower height did not pass the “Towair” slope calculations and requires registration. The existing tower has

an FAA “No Hazard” determination in aeronautical study No. 2008-AGL-2544-OE issued June 17, 2008. The tower will be registered following the 30 day waiting period for the FAA study to appear in the FCC’s ASR database.

FINISHED FINISHED FINISHED FINISHED FINISHED FINISHED

ENVIRONMENTAL PROTECTION ACT

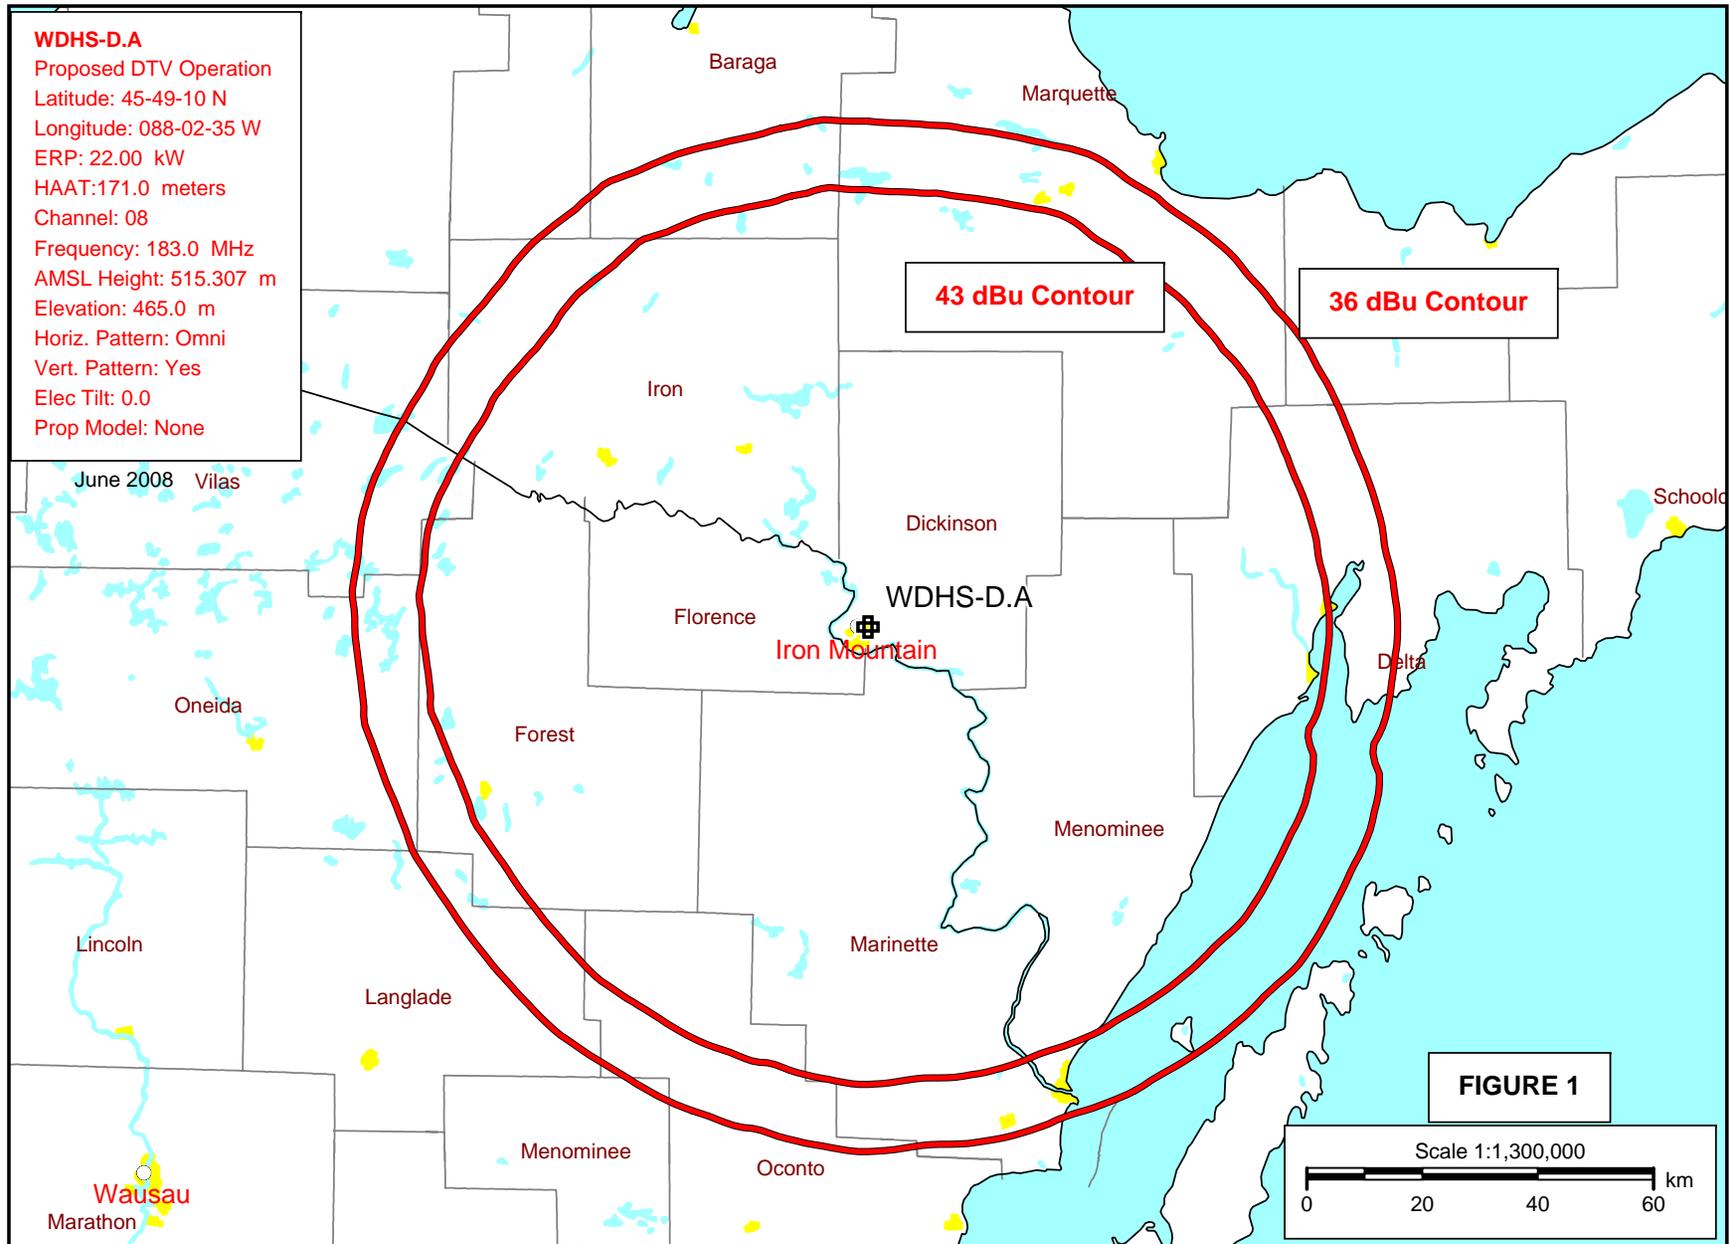

Since WDHS-DT will be using the existing tower for the DTV operation the environmental concerns listed in Section 1.1307(a) of the Commission's rules are not pertinent; therefore, those issues have not been addressed.

An evaluation has been made to determine compliance with the Commission's specified standards for human exposure to RF fields as set forth in the OET Bulletin No. 65 dated August 1997. For a maximum effective radiated power of 22 kW and a radiation center of 49 meters above ground level, the proposed Channel 8 DTV operation would have a maximum of 83.2 microwatts per square centimeter ($\mu\text{W}/\text{cm}^2$) RF field at 2 meters above the base of tower assuming an antenna field factor of 0.5 in the downward direction.

The Commission's guidelines for Channels 8 are 1,000 $\mu\text{W}/\text{cm}^2$ for the occupational/controlled and 200 $\mu\text{W}/\text{cm}^2$ for the general population/uncontrolled environment.

The above analysis indicates that members of the public and personnel working around the WDHS-DT tower would not be exposed to RF fields exceeding the Commission's guidelines. With respect to work performed on the tower, WDHS-DT has established procedures to ensure that workers are not exposed to RF fields above the Commission's guidelines, by reducing or turning off the power, as appropriate.

For the reasons stated above, it is believed this proposal complies with Section 1.1307(a) and (b) of the Commission's Rules; therefore, under Section 1.1306, it is categorically excluded from environmental processing.

COMPUTED NOISE LIMITED CONTOURS FOR THE PROPOSED OPERATION OF WDHS-DT, IRON MOUNTAIN, MI
