

MINOR CHANGE APPLICATION
WSAA, LLC
WSAA (FM) RADIO STATION
CH 226A - 93.1 MHZ - 3.5 KW
BENTON, TENNESSEE
June 2008

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of WSAA, LLC ("WL"), licensee of WSAA, Channel 226A, Benton, Tennessee. MCI proposes to make minor changes in the facilities of WSAA by relocating to a new site with an increase in height above ground, mean sea level, and above average terrain and a decrease in effective radiated power.

MCI is proposing to locate the antenna system for WSAA on a previously approved tower. As such, the Federal Aviation Administration was not apprised of this proposal. The tower has been registered with the Commission and assigned Antenna Structure Registration Number 1036626. At the proposed site for the WSAA facility, the predicted FCC 70 dBu contour does not completely encompass all of Benton, Tennessee. As such, a supplemental city grade coverage study has been prepared to show the predicted 70 dBu, using an alternate propagation model (Point-to-Point v2), does encompass all of Benton, Tennessee. See Exhibit A for details.

The proposed WSAA facility will be co-located on an AM tower. Therefore, the worksheets associated with FCC Form 301 could not be used to certify compliance with the radio

frequency radiation limits at the base of the tower. A study has, therefore, been undertaken to show the proposed WSAA facility is compliant with the Commission's RF exposure guidelines (Exhibit B).

WL does not have an attributable interest in any other broadcast facility. Therefore, a Radio Market Analysis is not needed. All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to MCI and is available to the Commission upon request.¹

1) For the purposes of environmental analysis, only the radio frequency radiation evaluation was undertaken by Graham Brock, Inc. The applicant has or will review the balance of the environmental reviews (i.e., location of site near areas of historic importance, Indian or tribal areas, etc.).
