

Three Angels Broadcasting Network
Dan Peek—Engineer
P.O. Box 220
West Frankfort, Illinois 62896

August 5, 2009

In evaluating the proposed digital flash cut for K39GT FID 130207, an outgoing interference study was executed on the proposed design in the attached application using the OET-69 Longley Rice methodology. The stations listed in the table below showed possible interference. When these stations were evaluated for outgoing interference, there was zero percent interference present found in each case when rounded to the nearest whole percent.

Three Angels Broadcasting Network recognizes the proposed signal will require international coordination with Canada. Everything has been done to assure that it will not cause any harm to Canadian broadcasters.
