

## **SUPPLEMENTAL RESPONSE TO FCC FORM 349, SECTION II, QUESTIONS 3-4**

The FM translator proposed in this application is intended to be used by the applicant, Pembroke Pines Elmira, Ltd. (“Pembroke Pines”), to provide “fill-in” service for the primary station, of which Pembroke Pines is the licensee. Accordingly, Pembroke Pines has answered Question 3(a) in the negative and Question 3(b) in the affirmative. While verbiage at the conclusion of Question 3 on FCC Form 349 indicates that, where those answers (*i.e.*, negative to Question 3(a), affirmative to Question 3(b)) are given, the applicant is precluded from receiving any support from the licensee of the primary station, Pembroke Pines understands that that verbiage is incorrect and that the Commission’s rules contemplate that, where a commercial FM station intends to use an FM translator for “fill-in” service and where the translator’s signal is completely encompassed within the 60 dB/u signal of the primary station, the licensee/applicant may be solely responsible for the costs of construction and operation of the translator.
