

**EXHIBIT 11**  
**Interference Analysis**  
**K41JO**  
**Facility ID No. 14500**

This Technical Exhibit is attached to FCC Form 346 in support of the Applicant's request for a Digital Flashcut. The proposed modified operational parameters for K41JO are as follows:

Channel	41
Out-of-channel Emission Mask:	STINGENT
Antenna radiation center height above ground level:	43 meters
Antenna Rotation:	55 degrees
Maximum effective radiated power:	1.5 KW
Antenna type and model #:	SCA 4DR-8-2HW
Transmitter Site	38-49-53 N 104-51-33 W

A study has been conducted using the provisions of sections 74.703 74.705, 74.706, 74.707, 74.708 and 74.709. This study indicates that the proposal will not create prohibited interference with other existing NTSC full power, DTV, LPTV, or Land Mobile facilities. This proposed facility complies with all interference protection requirements.
