Re: KXEN(AM), St. Louis, Missouri
Facility Identification Number: 54739
BDJ Radio Enterprises, LLC (BRE)
Special Temporary Authorization (STA)
BESTA-20130606ABO

Dear Ms. Sadowsky:

This is in reference to the request filed on June 6, 2013. BRE requests an extension of the STA originally granted on December 13, 2012, to operate with temporary facilities.¹ In support of the request, BRE states that it did not complete construction of the authorized STA facilities (and has remained operating with currently licensed facilities from the licensed site) because the licensed site was not sold as previously anticipated.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for STA extension IS HEREBY GRANTED, and station KXEN may commence operation with the following temporary facilities:

Geographic coordinates:	38° 38' 09" N, 90° 11' 45" W (NAD 1927)
Frequency:	1010 kHz
Operating hours:	Unlimited
Operating power:	0.35 kW daytime, 0.125 kW nighttime
Antenna:	74.2 meter vertical wire supported on face of a self-supporting tower located at the studios of KDNL(TV)
Radiator height:	90°
ASRN:	1003524

¹¹ KXEN is licensed for directional operation on 1010 kHz with 50 kW day and 0.5 kW night.

It will be necessary to further reduce power or cease operation if complaints of interference are received. BRE must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **January 10, 2014**. It should be noted that failure to file an FCC Form 301 application for a new site facility and/or provide a justification indicating a specific contract date that BRE will be required to vacate the licensed site will result in denial of any future request for extension and cancellation of the original STA (and BRE will be directed to file a new STA request after the actual loss of site date is known).

Sincerely,

A handwritten signature in blue ink, appearing to read 'Joseph Szczesny', with a large, stylized initial 'J'.
