

ENGINEERING STATEMENT  
Renard Communications Corp.  
April, 2011

Renard Communications Corp. (“Renard”), licensee of WBQM-LP, channel 3, Brooklyn, NY hereby requests a six-month extension of Special Temporary Authority (“STA”) authorized in BSTA-20100408ABA which was granted April 13, 2010 and extended in BESTA-21011012AFE.

Renard has been authorized to operate WBQM-LP in a digital mode since 2003 on its licensed channel 3 at a time when LPTV stations did not have regular digital authorizations available to them and digital operation was requested so as to minimize any potential interference to other services and equipment devices. Renard was originally granted experimental authorization and after the Commission adopted rules for LPTV stations to operate digitally, Renard was then granted Special Temporary Authority to continue its digital operation. Subsequently, Renard applied for and presently holds a construction permit (BMPDTL-20081216BLH) to change its operation to channel 50 as a digital LPTV channel. Renard expects to complete construction of its authorized facilities change to channel 50 this summer. Equipment for the new facility has been ordered and delivery is expected within the next several weeks. Therefore, Renard respectfully requests an extension of the STA so as to continue its present digital operation on channel 3.
