Three Angels Broadcasting Network
Dan Peek—Engineer
P.O. Box 220
West Frankfort, Illinois 62896

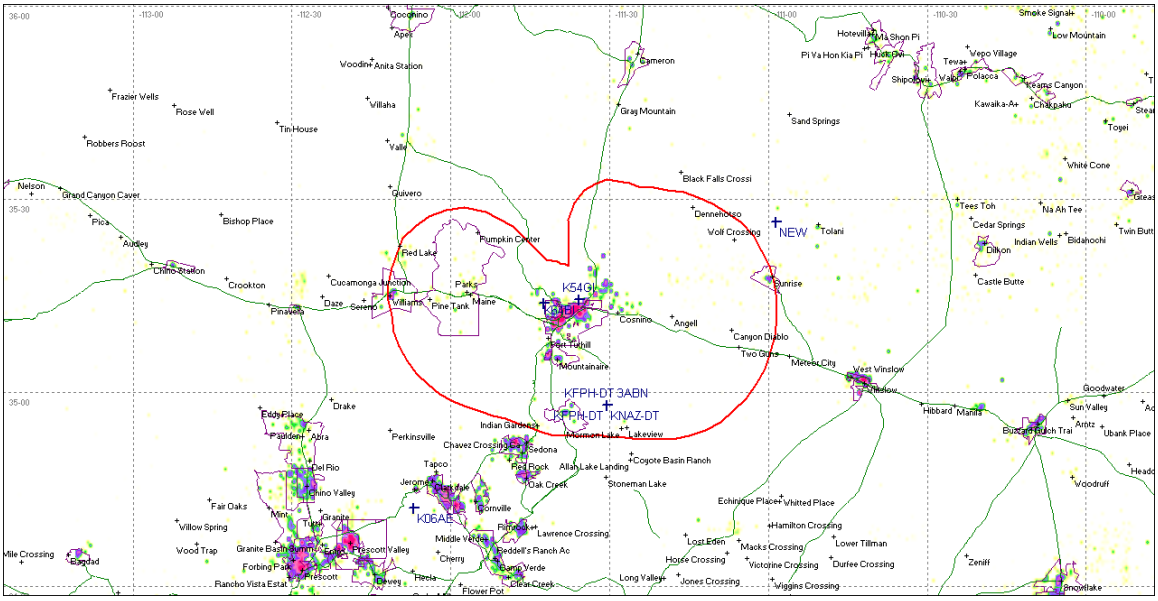

August 24, 2009

In evaluating the proposed NEW low-power digital television station, an outgoing interference study was executed on the proposed design in the attached application using the OET-69 Longley Rice methodology. The stations listed in the table below showed possible interference. When these stations were evaluated for outgoing interference, there was zero percent interference present found in each case when rounded to the nearest whole percent.

The applicant is also requesting a waiver of international coordination with Mexico since the 19dBu F(50,10) curve does not cross in to Mexican Territory.

The Black contour is the 121km lockout circle for Phoenix. The Red contour is the proposed protected contour. The Yellow contour is the proposed 19dBu F(50,10) contour.

The attached page identifies the considered list of stations when the outgoing interference analysis was executed.

STATIONS CONSIDERED IN THE OUTGOING INTERFERENCE STUDY
