Re: CC Licenses, LLC
WDIA (AM), Memphis, Tennessee
Facility Identification Number: 69569
Special Temporary Authority

Dear Mr. Langham:

This is in reference to the request filed May 5, 2011, on behalf of CC Licenses, LLC ("CCL"). CCL requests extension of the special temporary authority ("STA") granted on May 27, 2010, to operate Station WDIA with parameters at variance and/or reduced power while maintaining monitor points within licensed limits, and with a nondirectional antenna and reduced power.¹ In support of the request, CCL states that it has made substantial progress toward renovation of the WDIA transmission facility, but that work on the project has been halted by spring flooding. CCL states that it is hoped a proof will be completed this summer.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made substantial progress toward restoring licensed operation. Thus, extension of STA is warranted.

¹ WDIA is licensed for operation on 1070 kHz with 50 kilowatts daytime and 5 kilowatts nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WDIA may continue to operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. Operation with a temporary nondirectional antenna and reduced power not to exceed 12.5 kW daytime and 1.25 kW nighttime also is authorized, only as necessary to facilitate the repair work. It will be necessary to further reduce power or cease operation if complaints of interference are received. CCL must notify the Commission when licensed operation is restored.² CCL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **January 14, 2012**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a stylized, flowing script.
