

EXHIBIT E-1
COMPLIANCE WITH 73.207
FCC FORM 301
KLMR-FM, LAMAR, CO
JANUARY 5, 2006

This application is made on behalf of CCR-LAMAR IV, LLC, licensee of KLMR-FM, Lamar, Colorado.

KLMR-FM seeks consent to a one-step channel change from channel 227 to channel 228C1.

Figure 1 is a channel spacing study which shows that KLMR-FM can operate on Channel 228C1 from its proposed tower site and meet all required spacing towards other stations under 73.207 of the Commission rules. The only short spacing appears to be to a dismissed application for the former KIIQ Limon, Colorado (facility ID 85056). This application was dismissed on November 18, 2004. The application proposed a one-step upgrade from 229A to channel 229C at Limon. It appears that that application was technically flawed as it proposed short spacing towards KSBV Salida, Colorado. This application should be removed from the FCC database, but as yet, has not been removed.

It should also be noted, that the license of KIIQ Limon, Colorado has been cancelled as of June 24, 2005. While the licensee of the former KIIQ has appealed this action by the Commission, and has received a Special Temporary Authority to continue to operate KIIQ, it is only for the former licensed class A facilities of KIIQ. This application meets full spacing under 73.207 towards the class A STA facilities of KIIQ and the former licensed Class A facilities of KIIQ on channel 229A.

Thus, it was concluded, that the proposed operation of KLMR Lamar on channel 228C1 will be in full compliance with the spacing requirements under 73.207 of the Commissions rules.
