**RE: URGENT PETITION
WI2XAC (AM) Ponce, PR
FACILITY ID NO. 132564
FILE NO. BR-20151112XJM**

Dear Mr. Doyle:

I respectfully request you to reconsider the decision to shut down our synchronous booster WI2XAC, Ponce, Puerto Rico, dated November 29, 2016 which was addressed to our Washington Attorney, Mr. Francisco Montero.

We were never advised that the permit for this booster would only be extended for 5 years. Because of this we proceeded to install the booster and invested over \$600,000.00 in a 5 acres land and tower, etc. related equipment.

This booster has served its communities, plus the advantage that a person driving from San Juan to Ponce across the mountains of Puerto Rico can keep on listening our main 740 KHz signal all the way with no interruption.

Our service, to my knowledge, has never caused any interference to anybody in Puerto Rico or adjacent islands.

Because we consider that your office has made this decision without any valid reason, I respectfully request that a rulemaking should be granted making the booster station WI2XAC a permanent license.

Hoping you will be able to change your decision in the benefit of AM broadcasting, I remain,

Sincerely,

BESTOV BROADCASTING, INC.
