

EXHIBIT 12

This narrative exhibit is submitted to demonstrate that the instant proposal fully complies with the interference criteria set forth in Section 74.1204 of the Commission's rules.

Attached at exhibit 13 are a spacing study and maps demonstrating clearly that there is no prohibited overlap between this proposal and any other FM services. The attached FM spacing study demonstrates that this proposal would be fully spaced even as a full power Class A FM station to all but two other FM facilities. Two FM Translators and one full power FM have also been included on these maps. As demonstrated in these maps no prohibited overlap with these stations is predicted.

The five facilities that have been included on the attached maps are: WMXW, 103.3, Vestal, NY (60 dBu contour to proposed 40 dBu interfering contour); WQNY, 103.7, Ithaca, NY (54 dBu contour to prop. 94 dBu int. contour); WCIK, 103.1, Avoca, NY (60 dBu contour to prop. 54 dBu int. contour); W294AV, 103.3, Corning, NY (60 dBu contour to prop. 40 dBu int. contour); and W277BS, 103.3, Ithaca, NY (60 dBu contour to prop. 40 dBu int. contour).

W275AB 103.3 Elmira 74.1204(d) Narrative and its related exhibits are included to show allowable overlap under Section 74.1204(d) with this proposal's 94 dBu interference contour and the 54 dBu coverage contours of WQNY, Ithaca, NY. A scale of kilometers has been included on the maps. These maps were drawn to scale using the rfSoftware series of computer programs.
