Re: KCRU(FM), Oxnard, California
Facility Identification Number: 59085
Santa Monica Community College District
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed October 9, 2008, on behalf of Santa Monica Community College District ("SMCCD"). SMCCD requests modification of the special temporary authority ("STA") granted on October 6, 2008, for operation of Station KCRU with emergency antenna facilities pursuant to Section 73.1680.¹

In support of the request, SMCCD states that the emergency, one-bay antenna originally authorized following failure of the licensed antenna is not providing adequate coverage. SMCCD further states that it has determined that one of the three antennas in the licensed composite array is still operational and can be used to provide improved coverage.

Our review indicates that the proposed STA operation will not result in extension of the 60 dBu contour beyond the licensed contour.

Accordingly, the request for modification of STA IS HEREBY GRANTED. Station KCRU may operate with the following facilities:

Geographic coordinates:	34° 06' 47" N, 119° 03' 34" W (NAD 1927)
Channel	206 (89.1 MHz)
Effective radiated power:	0.8 kilowatt (H&V)
Antenna manufacturer and type:	Scala, model CA5-FM/CP
Antenna orientation:	305° True
Antenna height:	

¹ Station KCRU is licensed for operation on Channel 206A (89.1 MHz) with effective radiated power of 0.85 kilowatt (Max-DA, H&V), and antenna height above average terrain ("HAAT") of 260 meters.

above ground:	15 meters
above mean sea level:	405 meters
Above average terrain:	260 meters

SMCCD must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **January 10, 2009**.

Sincerely,

Charles N. Miller, Engineer
