Interference Area to KXRI (Lic) and KXRI (App)
Soncy, Texas

The Proposed translator is within the 60 dBu contour of upper second adjacent station KXRI (Lic), channel 220, and upper second adjacent station KXRI (App) channel 220. The KXRI (Lic) contour at the translator site is 89.6 dBu (F50,50) and the KXRI (App) contour at the translator site is 94.0 dBu (F50,50). Using the ratio of 100:1 (translator to KXRI (Lic) and KXRI (App)) on the second adjacent channels, the population within the proposed translator 129.6 dBu and 134 dBu contour is zero. Using the free space equation, the predicted interference area is expected to extend 23 meters for KXRI (Lic), and 14 meters for KXRI (App), from the antenna. The antenna is 60 meters above ground level thus the interference area will never reach the ground.

Therefore, the application is in compliance with the following: §74.1204 (d) "The provisions of this section concerning prohibited overlap will not apply where the area of such overlap lies entirely over water. In addition, an application otherwise precluded by this section will be accepted if it can be demonstrated that no actual interference will occur due to intervening terrain, lack of population or such other factors as may be applicable."
