EXHIBIT #5

§307(b) Comparison - Camden / Saint Stephen, South Carolina

This application seeks to change the community of license of WEAf, 1130 kHz, from Camden, South Carolina to Saint Stephen, South Carolina using the city of license change procedures, as outlined in MB Docket #05-210, released November 29, 2006. This is a review of the proposed change and demonstrates compliance with the Commission's new rules and procedures for a change of community of license.

The proposed facility at Saint Stephen, South Carolina is mutually exclusive with the licensed WEAf facility at Camden, South Carolina. WEAf is not the only station presently licensed to Camden, South Carolina. AM Station WCAM, 1590 kHz, and FM station WPUB-FM, Channel 274A, are both licensed to the community. As a result of the proposed change, the community of Saint Stephen will receive its first locally licensed/operational station without depriving Camden of its only local service.

Exhibit #1B2 is a coverage map for WEAf at Saint Stephen, South Carolina showing the proposed facility will provide a 5.0 mV/m contour over all of the proposed new community of license. The proposed site will be the site of a new tower structure, which will be unlit and is not of sufficient height to require FAA clearance or FCC registration.

Therefore, GCI proposes the following:

Camden, South Carolina

Present	Proposed
WEAF, WCAM, WPUB-FM	WCAM, WPUB-FM

Saint Stephen, South Carolina

Present	Proposed
WTUA, 291A	WEAF

As shown in Exhibit #5A, the existing WEAFF at Camden, South Carolina provides a 2.0 mV/m contour to 54,579 persons over 1,826 square kilometers and a 0.5 mV/m contour to 345,927 persons over 6,932 square kilometers. The proposed WEAFF at Saint Stephen will provide a 2.0 mV/m contour to 16,511 persons over 1,128 square kilometers and a 0.5 mV/m contour to 79,391 persons over 3.921 square kilometers. WEAFF is proposing no nighttime operation.

As a result of the relocation, loss and gain areas are created. Exhibit #5B is a depiction of the authorized daytime AM and FM services in the WEAFF loss area. Exhibit #5B1 is a tabulation of the daytime stations providing service to the loss area. Exhibit #5C is a map which depicts the authorized daytime AM and FM services in the WEAFF gain area. A tabulation of the daytime stations providing service to the gain area is attached as Exhibit #5C1.¹

1) To determine services, commercial and non-commercial AM and FM stations in the area were reviewed. For FM commercial stations, maximum facilities were used for each Class, except Class A and Class C facilities. Some Class A stations were considered 3.0 kilowatt Class A stations, while others were depicted as 6.0 kilowatt Class A stations, based on their operating facilities, or spacing review. Class C FM stations were considered, based on the reference contour determined by the station's licensed power and height, at either minimum Class C (83.5 kilometers) or licensed facility if greater. Any non-commercial FM station's 60 dBu reference contour was determined from its licensed facility, based on the reference distance, which was determined by power and HAAT of the facility. All FM contours assumed uniform terrain.

Exhibit #5D is a depiction of the stations providing protected service to Camden, South Carolina. Exhibit #5D1 is a tabulation of those stations.² Exhibit #5E is a depiction of the stations providing protected service to the proposed community of license of Saint Stephen. Exhibit #5E1 provides a tabulation of those stations.³

Saint Stephen is a community deserving of a locally license station. By changing its community of license and relocating, the proposed WEAJ would provide that service to Saint Stephen. Saint Stephen was incorporated in 1955 and has a population of 2,877.⁴ It has a Town Council with a Mayor and six Council Members. Saint Stephen has a Town Hall with its own Municipal Court and Clerk of the Court. Saint Stephen has its own Police Department and a Public Works Department that provides curbside trash collection and maintenance for the city parks and streets. The community also has many businesses and churches that are identified by the use of "Saint Stephen" in their name.⁵ St. Stephen is not located in any Urbanized Area.

-
- 2) As the population of Camden is more than 2,500 persons, the 2.0 mV/m contour for AM stations was depicted.
 - 3) As the population of Saint Stephen is less than 2,500 persons, the 0.5 mV/m contours for AM stations was depicted.
 - 4) 2000 U.S. Census
 - 5) This application provides replacement service for WTUA, which seeks to change its city of license to Pinopolis, South Carolina in a contingent application.

WEAF - CAMDEN, SC

Freq: 1130 kHz / Class: D
Latitude: 34-15-32 N / Longitude: 080-34-47 W
Power: 5 kW / RMS: 299.34 mV/m @ 1km
Towers: 1
Present Facility - Dashed Line

WEAF - Saint Stephen, SC

Freq: 1120 kHz / Class: D
