EXHIBIT A

Allocation Reference Site

This application seeks to re-allot Channel 271C0 from Savannah, Georgia to Tybee Island, Georgia. As denoted on Exhibit A1, from the proposed allocation reference site, which is the same location as the present WZAT license, Channel 271C0 meets the Commission's minimum distance separation requirements to all licensed, proposed, or applied for facilities with the exception of the authorized site for WZAT. From the proposed allocation reference site, a maximum Class C0 would place a theoretical 70 dBu signal over 100% of the community of Tybee Island, Georgia, as does the predicted 70 dBu contour from the proposed WZAT facility, as shown on Exhibit A2. Further, as the proposed site is an existing structure, it is suitable for tower construction. Therefore, this proposal meets the Commission's allocation criteria.
