

WEST VIRGINIATM
PUBLIC BROADCASTING

www.wvpubcast.org

I, Ollin David McClanahan, certify that I personally observed the installation of a Dielectric DCR6CD antenna on West Virginia Public Broadcasting's tower at 1459 Garfield Avenue in Charleston, WV.

All manufacturer's instructions were followed. A licensed surveyor was contracted to assure azimuth compliance.

I have been employed as full-time broadcast engineer since 1985. From 1985 to 1996 I was employed by West Virginia Public Radio. From 1996 to 2002 I was assistant chief engineer for WOWK-TV in Huntington, WV. From 2002 to present I am the Engineering Manager for West Virginia Public Broadcasting.
