

## **Request for Waiver of 47 C.F.R Section 73.509**

American Family Association is seeking to increase the power of WWGV – Grove City, OH. The proposed increase in power would result in incoming interference from the following station.

WUFM-FM – Columbus, OH – Facility ID#20758

This application will not cause interference to WUFM. WWGV's proposed interfering 100 dBu contour will not overlap WUFM's 60 dBu contour as noted in included exhibits. WWGV's proposed 60 dBu contour would be overlapped by WUFM's 100 dBu contour. The area of overlap would be 14.83 square km or .54% of total area covered by proposed application.

The application of WWGV will increase coverage area by 1,041.24 square kilometers or an increase of 56.11%. An estimated 272,655 more persons will be covered by the application which is an increase of 234.44%.

Based on previous request for waiver of Section 73.509 of the FCC's rules in regards to overlap received being granted to noncommercial education stations to aid in expansions, American Family Association request that a waiver of Section 73.509 be granted.
