**Subject:** Successful Coordination for Measurement of KALC FM 105.9 MHz

KALC FM  
Jeff Garrett DOE  
4700 South Syracuse St  
Denver CO 80237

Dear Mr. Garrett,

On June 1, 2005, the Department of Commerce measured the new antenna for KALC FM 105.9 MHz located on Lookout Mountain. The measurements evaluated the effects of the new KALC FM signal at the Table Mountain Radio Quiet Zone.

The measured signal at Table Mountain is 79.6 dBuV/m. The maximum allowable level is 80 dBuV/m. The KALC FM transmitter is in compliance with Table Mountain limits and successfully coordinated. We will continue to make periodic measurements of the KALC FM signal to ensure it remains in compliance.

Many thanks to you and your crew for your extended efforts in coordinating the measurement schedule.

Respectfully,

Teresa Maraia  
Dept of Commerce  
Telecommunications Specialist  
Radio Frequency Management
