

MINOR CHANGE APPLICATION
MADIFIDE, INC.
WFID (FM) RADIO STATION
CH 239B - 95.7 MHZ - 11.5 KW
RIO PIEDRAS, PUERTO RICO
August 2011

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Madifide, Inc. (“MI”), licensee of WFID, Channel 239B, Rio Piedras, Puerto Rico. MI herein proposes to make minor changes in the WFID facilities by relocating the transmitter site, decreasing the center of radiation above ground level, increasing the height above mean sea level and height above average terrain and decreasing the effective radiated power.¹

MI is proposing to implement this change at an existing tower site. As such, the Federal Aviation Administration was not apprised of this proposal. The tower has been registered with the Commission and assigned Antenna Structure Registration Number 1011469. The proposed WFID will be co-located with other FM stations and numerous TV stations on the existing tower located in a de facto tower farm. As such, the worksheets associated with FCC Form 301 could not be used to certify compliance with the radio frequency radiation limits at the base of the tower. A study has, therefore, been undertaken to show the proposed WFID facility is compliant with the Commission’s RF exposure guidelines (Exhibit A).

1) The facilities proposed herein for WFID are the same as the facilities authorized in BMPH-20100728ACB.

All other necessary documentation used to certify the technical portion of FCC Form has been forwarded to MI and is available to the Commission upon request.²

2) The undersigned has evaluated only the radio frequency radiation exposure portion of the environmental review. All data was extracted from the CDBS database on the date indicated on the spacing study, which is included with the reference material sent to MI. We assume no liability for errors or omissions in that database which may be adverse to the information contained herein.
