

MAIN STUDIO WAIVER

Educational Media Foundation ("EMF"), the proposed assignee of FM radio station KLRQ(FM), Clinton, Missouri¹, hereby respectfully requests a waiver of Section 73.1125 of the Commission's rules (hereinafter referred to as the "main studio rule") to permit the relocation of the main studio of KLRQ from its present location in Clinton, Missouri to the main studio of EMF's co-owned station KLVR(NCE-FM), Santa Rosa, California. The proposed studio location is approximately 1,554.6 kilometers (2,485.7 miles) outside of the 3.16 mV/m contour of KLRQ.

EMF proposes to operate KLRQ as a "satellite" station of KLVR. KLRQ will be part of a network of radio broadcast stations operated by EMF known as the "K-LOVE Radio Network." EMF is a non-profit corporation and each network station operates noncommercially and broadcasts the noncommercial educational programming carried on the K-LOVE Radio Network. By co-locating KLRQ's main studio at KLVR's main studio in Santa Rosa, EMF will realize valuable economies of scale and cost savings, which are needed to maintain the high quality of K-LOVE's noncommercial educational programming. As a listener-supported station, KLRQ will face severe financial constraints. The obligation to maintain separate staffing and studio locations for both KLRQ and KLVR will place a serious financial burden on EMF and divert what limited resources are available from K-LOVE's programming efforts.

To ensure that KLRQ fulfills its local service obligations to the residents of Clinton, EMF will maintain an auxiliary studio either: 1) in Clinton; 2) at a location within the principal community contour of an AM, FM, or TV station licensed to Clinton; or 3) within twenty-five miles from the reference coordinates of the center of Clinton. This auxiliary studio will be capable of originating local programming that is responsive to local community needs. EMF will also engage the services of a local Clinton public affairs representative to conduct ascertainment surveys of local community leaders and other residents to determine the concerns, problems and needs of Clinton listeners, which will be covered in K-LOVE's news and public affairs programming. The method for ascertaining the needs and concerns of its Clinton listeners will be similar to the method EMF has employed to effectively ascertain the needs of its listeners in other communities where the Commission has granted waivers of the main studio rule. Specifically, EMF will have a local representative, who may be a volunteer, available in the community of Clinton, Missouri. The local representative will work with EMF's Regional Managers² and will, at least on a quarterly basis, conduct interviews and surveys in an effort to

¹ On August 20, 2003 an application was filed seeking Commission consent to the voluntary assignment of license of KLRQ(FM), Clinton, Missouri from B & F Broadcasting, Inc. to EMF. See FCC File No. BALH-20030820ACA.

² EMF has Regional Managers who oversee the stations that have been granted waivers of the main studio rule. The

ascertain the interests, concerns, and needs of the Clinton listeners.

EMF's local representative will further serve as a liaison between the residents of Clinton and EMF's programming personnel. Finally, EMF will maintain a toll-free telephone number, as required by Section 73.1125(d) of the rules, and maintain a public inspection file, as required by Section 73.3527 of the Commission's rules.

Under Section 73.1125 of the Commission's rules, a broadcast station must maintain its main studio (a) within the station's community of license; (b) at a location within the principal community contour of any AM, FM, or TV broadcast station licensed to the station's community of license; or (c) within 25 miles from the reference coordinates of the center of the station's community of license, except when "good cause" exists for locating the main studio at an alternate location. The Commission traditionally considers waiver requests by noncommercial educational stations on a case-by-case basis. See Main Studio and Program Origination Rules, 3 FCC Rcd 5024 (1988); see also Review of the Commission's Rules Regarding the Main Studio and Local Public Inspection Files of Broadcast Television and Radio Stations, 13 FCC Rcd 15691, 15695 n.18 (1998). In the context of noncommercial waiver requests, the Commission has expressly and implicitly found "good cause" to exist in numerous instances based solely upon a showing that centralized operations will provide an economic benefit to noncommercial stations which have limited funding, provided that local service obligations are met. See Letter to Roy R. Russo, Esq., dated January 24, 1994; Letter to Richard J. Bodorff, dated January 2, 1992; The President and Board of Trustees of the Miami University, 7 FCC Rcd 2902 (1992); The Cedarville College, 6 FCC Rcd 538 (1991); Letter to Gerald Stevens-Kittner, Esq., dated July 15, 1991; Sound of Life, Inc., 4 FCC Rcd 8273 (1989); Lift Him Up Outreach Ministries, Inc., 3 FCC Rcd 5571 (1988); Georgia State Board of Education, 70 F.C.C.2d 948 (1979), recon. denied, 71 F.C.C.2d 227 (1979); Nebraska Educational Television Comm'n, 4 R.R.2d 771 (1965).

Furthermore, in the past the Commission has granted main studio waivers for stations located more than one thousand miles from the parent station, including the grant of a main studio waiver for EMF for WKVF(FM) (formerly WYLT(FM)) , which is located 2,945 kilometers from its parent station KLVR(FM). See also, Letter to Robert G. Schwartz, Esq., dated November 4, 1999 (granting EMF a main studio waiver for KXLV(FM) (formerly KLMN(FM), Amarillo, Texas), to operate as a satellite of KLVR(FM), approximately 1,300 miles away).

EMF respectfully submits that the instant request presents substantially the same showing of good cause and public interest benefits as each of these waivers noted above. In each case, the Commission staff determined that the waivers were justified on the basis of the limited funding available to the stations and the increased efficiencies resulting from co-location of studios. Like these other waiver applicants, EMF will also experience financial difficulties in maintaining separate staffing and separate facilities for its "parent" and "satellite" stations. EMF will also be

Regional Managers typically oversee a number of stations within a defined geographic area.

fully capable of fulfilling its local service obligations in the same manner as each of these other applicants.

In view of the foregoing, EMF requests that the Commission find pursuant to Section 73.1125(b)(2) of the Commission's rules that the public interest will be served by the consolidation of KLRQ's main studio with KLVR's main studio, and authorize EMF to locate KLRQ's main studio outside of the city grade community and contour of the station and more than 25 miles from the reference coordinates of the center of Clinton.
