

**Technical Statement**  
**Application for Construction Permit**  
**W295AA Facility ID 46502 Middletown, NY**  
**April, 2011**

The purpose of this application is to make two changes. (1) Change frequency to 106.3 MHz. (channel 292) and (2) Change Effective Radiated Power to 99 watts. The primary station remains WOSR, Facility ID # 70848.

The proposed facility is a fill-in translator for WOSR. The 60 dBu contour of the proposed translator station is completely within the 60 dBu contour of the primary station, WOSR. The proposed translator is fully spaced to all other facilities.
