

Multiple Ownership

The purpose of this exhibit is to demonstrate that the modification of facilities of KAMA-FM complies with the FCC's rules and regulations concerning multiple ownership. Specifically:

Station KAMA-FM, is licensed to a subsidiary of Univision Communications Inc. ("UCI"), which through various subsidiaries, is the ultimate owner of the following additional broadcast stations in the Houston-Galveston Arbitron radio market and Nielsen television DMA:¹

KLAT(AM), Houston, Texas
KLTN(FM), Houston, Texas (contingent application to move to Missouri City, TX)
KOVE-FM, Galveston, Texas
KPTI(FM), Crystal Beach, Texas
KRTX(AM), Rosenberg/Richmond, Texas
KXLN-TV, Rosenberg, Texas
KFTH-TV, Alvin, Texas

Radio Multiple Ownership

Attached is a printout from BIA Media Access Pro demonstrating that each of the above radio stations is physically located in and home to the Houston-Galveston Arbitron radio market. Upon grant of the instant modification application, station KAMA-FM will remain physically located in and home to the market. There are 68 radio stations in the Houston-Galveston radio market. Pursuant Section 73.3555 of the Commission's rules, in a market this size, an entity may hold an attributable interest in up to eight radio stations, no more than five of which are in the same service. Accordingly, common ownership of the above radio stations complies with the radio multiple ownership rule.

¹ Previously, Thomas H. Lee Partners held an indirect attributable interest in UCI, and had an attributable interest in three additional FM radio stations in the Houston-Galveston Arbitron Market: KFNC(FM), Beaumont, Texas; KIOL(FM), La Porte, Texas; and KRBE(FM), Houston, Texas. THL's acquisition of an attributable interest in the UCI stations was approved by the Commission, subject to a temporary waiver to come into compliance with the Commission's multiple ownership rules in In the Matter of Shareholders of Univision Communications Inc., 22 FCC Rcd 5842 (released March 27, 2007). The Commission has since issued an Order determining that THL has taken the necessary steps to come into compliance with the multiple ownership rules. See Shareholders of Univision Communications Inc., FCC 08-48 (released February 12, 2008).

Radio-Television Cross Ownership:

Attached hereto are maps showing the Grade A contours of commonly owned television stations KXLN-TV and KFTH-TV, and the 1 mV/m contours of the above FM stations and the 2 mV/m contours of the above AM stations. Each television station wholly encompasses the communities of Houston (KLAT(AM), KLTN(FM)); Missouri City (KAMA-FM's current community of license and KLTN's proposed community of license); Deer Park (KAMA-FM's proposed community of license); and Rosenberg/Richmond (KRTX(AM)). These overlaps create a market of two television and four radio stations.

In addition, the relevant contours of KRTX(AM); KLTN(FM); KLAT(AM) and KOVE-FM (CP) wholly encompass the communities of license of KXLN-TV and KFTH-TV, creating an additional market of two TV and four radio stations. In addition, the 1 mV/m contour of KAMA-FM as proposed herein, encompasses Alvin, the community of license of KFTH-TV, creating an additional combination of one TV and five radio stations.

Pursuant to Section 73.3555(c)(2), common ownership of up to two television and six radio stations, or one television and up to seven radio stations, in a market is permitted where at least 20 independent voices will remain in the market and the requirements of the radio multiple ownership and television duopoly rules are also satisfied.² As shown on the attached printout from BIA Media Access Pro, there will remain 20 independent voices in the Houston-Galveston radio market, without consideration of the additional television, cable and newspaper voices in the Houston DMA. Accordingly, the common ownership of two television and up to six radio stations is permissible under Section 73.3555(c) of the Commission's rules.

² The number of voices includes the number of independently owned and operated radio stations in the radio metro market of the television station's or of the radio station's community of license, independently owned and operated out-of-market radio stations with a minimum share in the market, independently owned and operated full power broadcast television stations in the DMA of the television station's community of license that have Grade B overlap with the television station to be commonly owned, certain English-language newspapers, and a cable system where cable television is generally available to households in the DMA.
