

EXHIBIT 11

This narrative exhibit is submitted to demonstrate that the instant proposal fully complies with the interference criteria set forth in Section 74.1204 of the Commission's rules. Attached at exhibit 12 are a spacing study, an additional narrative exhibit which includes a Section 74.1204(d) showing, and maps demonstrating clearly that there is no prohibited overlap between this proposal and any other FM services. The attached FM spacing study demonstrates that this proposal would be fully spaced even as a full power Class A FM station to all but five other FM facilities. The attached maps and Section 74.1204(d) study with regard to overlap between this proposal and the coverage contours of WHGL-FM, Canton, PA demonstrate that there is no prohibited contour overlap between these five facilities and the instant proposed FM translator facilities. One new FM translator and one full power FM station have also been included on the maps because of their proximity to the proposed facilities. As demonstrated in these maps no prohibited overlap with these stations is predicted.

The seven facilities that have been included on the attached maps are: WOKN, 99.5, Southport, NY (two 60 dBu contours to proposed 54 dBu interference contour); WIII, 99.9, Cortland, NY (54 dBu contour to prop. 48 dBu int. contour); WHGL-FM, 100.3, Canton, PA (two 57 dBu contours to prop. 97 dBu int. contour); WSPI, 99.7, Mount Carmel, PA (60 dBu contour to prop. 40 dBu int. contour); WQBR, 99.9, Avis, PA (60 dBu contour to prop. 54 dBu int. contour); W259AJ, 99.7, Galeton, PA (60 dBu contour to prop. 40 dBu int. contour); and WAAL, 99.1, Binghamton, NY (54 dBu contour to prop. 94 dBu int. contour). WVIA 99.7 Mainesburg, PA Interference Analysis, Blown Up Scale will show more clearly, with a blown up scale, that there is no prohibited overlap between this proposal's 54 dBu

interference contour and the 60 dBu contours of WOKN, 99.5, Southport, NY. WVIA 99.7 Mainesburg, PA 74.1204(d) Narrative and its related maps are included to show allowable overlap under Section 74.1204(d) with this proposal's 126 dBu interference contour and the 86 dBu coverage contour of WHGL-FM, Canton, PA. A scale of kilometers has been included on the maps. These maps were drawn to scale using the rfSoftware series of computer programs.
