Re: North Georgia TV Channel 49 Digital Flash Cut

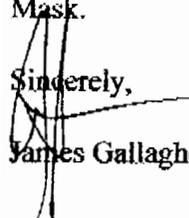

Ladies and Gentlemen:

Tiger Eye Broadcasting Corp. understands that North Georgia TV is applying for a digital flash cut for WDNN in Dalton, GA on channel 49.. Tiger Eye holds a CP on channel 48 (WOOT) from a site north of WDNN and is licensed to Chattanooga, TN.

The channel 49 flash cut application of WDNN is not predicted to cause interference for WOOT when WDNN uses a part 73 emissions mask. We understand that North Georgia TV will cooperate to resolve any interference issues that arise from the grant of their digital flash cut application.

Consequently, Tiger Eye Broadcasting has "No Objection" to the grant of WDNN's channel 49 flash cut application provided it is issued with the requirement to use the Part 73 Emissions Mask.

Sincerely,

  
James Gallagher
