

TECHNICAL STATEMENT
CAPSTAR TX LIMITED PARTNERSHIP
RADIO MULTIPLE OWNERSHIP ANALYSIS -10/16/2003

This statement and the attached figures were prepared on behalf of Capstar TX Limited Partnership (**CTLP**) a licensee subsidiary of Clear Channel Communications, Inc. (**CC**). **CTLP** proposes to modify the facilities of WBVD(FM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Table 1: Proposed Commonly Owned or Controlled Stations Studied

Call Sign	State	City	Freq
WBVD-DA	FL	MELBOURNE	95.1
WJRR	FL	COCOA BEACH	101.1
WLRQ-FM	FL	COCOA	99.3
WMMB	FL	MELBOURNE	1240
WMMV	FL	COCOA	1350
WSHE	FL	ORLANDO	100.3
WSHE	FL	ORLANDO	100.3
WTKS-FM	FL	COCOA BEACH	104.1

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission's multiple ownership rules¹.

CC does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the proposed modified station.

Radio Markets

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. These mutually overlapping contours form one "radio markets", as shown in *Figure 1*, for analysis under the Commission's rules.

¹ See 47 C.F.R. § 73.3555. (2001)

Listing of "Market" Stations:

MARKET

2-AM 5-FM

WMMB(AM)

WMMV(AM)

WBVD(FM) PROP

WJRR(FM)

WLRQ(FM)

WSHE(FM) LIC AND APP

WTKS(FM)

Count of Stations in Defined Markets

The number of radio stations in a "radio market" is determined by counting the operating, commercial stations having principal community contours that overlap or intersect the principal community contours that define the radio market, plus the subject commonly owned or controlled stations.

For simplicity of analysis only of stations overlapping or intersecting the contour of WJRR(FM) have been tabulated.

There are at least 45 stations that are not attributable to Clear Channel Communications, Inc. or its licensee subsidiaries that are counted as being "in" the market.

Only known licensed, operating commercial stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 10 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with § 73.3555(a) of the FCC Rules.

Sincerely,

Troy G. Langham

FCC Specialist
