Re: Broadcast antenna orientation

To whom it may concern;

On June 22, 2009, King Surveyors Inc. assisted with the orientation of the KRAN broadcast antenna on the tower near the intersection of Dell Range Blvd and Highway 30, located in Cheyenne, Wyoming.

I attest that the orientation of this antenna is within one degree of 172° True North Azimuth, as instructed.

Sincerely,

John M. Childers - on behalf of King Surveyors, Inc.
